African Economic Development

Christopher Cramer, John Sender, Arkebe Oqubay, 2020 This book challenges conventional wisdoms about economic performance and possible policies for economic development in African countries Its starting point is the striking variation in African economic performance Unevenness and inequalities form a central fact of African economic experiences The authors highlight not only differences between countries but also variations within countries differences often organized around distinctions of gender class and ethnic identity For example neo natal mortality and school dropout have been reduced particularly for some classes of women in some areas of Africa Horticultural and agribusiness exports have grown far more rapidly in some countries than in others These variations and many others point to opportunities for changing performance reducing inequalities learning from other policy experiences and escaping the ties of structure and the legacies of a colonial past The book rejects teleological illusions and Eurocentric prejudice but it does pay close attention to the results of policy in more industrialized parts of the world Seeing the contradictions of capitalism for what they are fundamental and enduring may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth linear process or that it would be were certain impediments suddenly removed The authors criticize a wide range of orthodox and heterodox economists especially for their cavalier attitude to evidence Drawing on their own decades of research and policy experience they combine careful use of available evidence from a range of African countries with political economy insights mainly derived from Kalecki Kaldor and Hirschman to make the policy case for specific types of public sector investment

Development and Rural Public Health Michael Hendryx, 2024-07-13 This book offers strategies and solutions for rural communities dependent on fossil fuel economies to enable them to transition to sustainable development. The move to renewable energy development and use is gaining global traction and will inevitably become standard practice in the coming years, and yet vulnerable communities around the world remain dependent on finite resource extraction for local economic activity. What will happen to these communities as the fossil fuel era fades away? Dependence on declining resource extraction economies arises from entrenched short-term interests in political and corporate worlds and in the knowledge, skills, and opportunities that local populations have at their disposal. The edited volume takes a public health perspective by showing how dependence on fossil fuel extraction and processing economies creates not only environmental and economic problems but also public health disparities. More importantly, rather than documentation of problems and obstacles, this book focuses primarily on solutions, on real examples happening right now in communities around the world, to take charge of their futures. A series of case studies provide examples of local efforts underway in these communities to create sustainable economic alternatives to fossil fuel dependence. The final section of the volume describes theory-based and empirically grounded development priorities that are needed to make transitions achievable and long-lasting, including improvements in adolescent health and well-being, regenerative development, sustainable food systems, adult education, and community-based leadership. Finally, case studies and development priorities are integrated within a new rural development framework to guide other communities in their own transition efforts. Although the challenges are daunting, the book is ultimately optimistic and forward-looking. *Sustainable Development and Rural Public Health: From Fossil Fuels to Greener Futures* is essential reading for public health practitioners and researchers, social justice advocates, and students in sustainability studies, environmental justice, and related areas. Rural health professionals, community leaders, environmental planners, policy makers, industry leaders, and entrepreneurs also will find this resource useful for their work.
