Readings in Sexualities from Africa Rachel Spronk, Thomas Hendriks, 2020-02-04 Images and stories about African sexuality abound in today's globalized media Frequently old stereotypes and popular opinion inform these stories and sex in the media is predominately approached as a problem in need of solutions and intervention The authors gathered here refuse an easy characterization of African sexuality and instead seek to understand the various erotic realities sexual practices and gendered changes taking place across the continent They present a nuanced and comprehensive overview of the field of sex and sexuality in Africa to serve as a guide though the quickly expanding literature This collection offers a set of texts that use sexuality as a prism for studying how communities coalesce against the canvas of larger political and economic contexts and how personal lives evolve therein Scholars working in Africa the U S and Europe reflect on issues of representation health and bio politics same sex relationships and identity transactional economies of sex religion and tradition and the importance of pleasure and agency This multidimensional reader provides a comprehensive view of sexuality from an African perspective

Ten Years of Democratic South Africa Aurelia Wa Kabwe-Segatti, 2006 For the past ten years South Africa has been progressively coming out of the apartheid system Although all ties with the former regime have been severed completely managing the heavy structural legacy has made the transition a difficult as well as an ambivalent process difficult because the expectations of the population contrast with the complexity of the stakes which have to be dealt with and ambivalent because the transition is based on innovations as well as continuities The contributions gathered in this book will try to

clarify the trajectory of that transition Offered analyses share a critical look without complacency nor contempt on the transformations at work Crossing disciplines and dealing with South Africa as an ordinary and standardised country that can no longer be qualified as being a miracle or an exception gives us an opportunity to address themes that are essential to understanding post apartheid society land reforms immigration policies educational reforms AIDS Health and Health Care in South Africa H. C. J. Van Rensburg,2004 Health and healthcare in South Africa attempts to capture the essence of transformation and trends in the South African health sector It offers on the one hand an overview of recent and current developments in the South African health care system and on the other of trends in the health status of the South African population The book is a follow up to the well known Health care in South Africa structure and dynamics Van Rensburg Fourie Pretorius 1992 published just before the transition to a democratic society The book retains a strong historical thread but the focus is generally on the nature of the transformation process gains made and failures encountered **A Century of South African Theatre** Loren Kruger,2020 Theatre is not part of our vocabulary Sipho Sepamla s provocation in 1981 the year of famous anti apartheid play Woza Albert prompts the response yes indeed it is A Century of South African Theatre demonstrates the impact of theatre and other performances pageants concerts sketches workshops and performance art over the last hundred years Its coverage includes African responses to pro British pageants celebrating white Union in 1910 such as the Emancipation Centenary of the abolition of British colonial slavery in 1934 organized by Griffiths Motsieloa and HIE Dhlomo through anti apartheid testimonial theatre by Athol Fugard Maishe Maponya Gcina Mhlophe and many others right up to the present dramatization of state capture inequality and state violence in today s unevenly democratic society where government has promised much but delivered little Building on Loren Kruger s personal observations of forty years as well as her published research A Century of South African Theatre provides theoretical coordinates from institution to public sphere to syncretism in performance in order to highlight South Africa s changing engagement with the world from the days of Empire through the apartheid era to the multi lateral and multi lingual networks of the 21st century The final chapters use the Constitution s injunction to improve wellbeing as a prompt to examine the dramaturgy of new problems especially AIDS and domestic violence as well as the better known performances in and around the Truth and Reconciliation Commission Kruger critically evaluates internationally known theatre makers including the signature collaborations between animator designer William Kentridge and Handspring Puppet Company and highlights the local and transnational impact of major post apartheid companies such as Magnet Theatre **The South African Development Directory** ,1996 **The Southern African Development Directory** ,1996 **AIDS in the Shadow of Biomedicine** Isak Niehaus,2018-12-15 The Bushbuckridge region of South Africa has one of the highest rates of HIV infection in the world Having first arrived in the area in the early 1990s the disease spread rapidly and by 2008 life expectancies had fallen by 12 years for men and 14 years for women Since 2005 public health facilities have increasingly offered free HAART highly active antiretroviral therapy

treatment offering a degree of hope but uptake and adherence to the therapy has been sporadic and uneven Drawing on his extensive ethnographic research carried out in Bushbuckridge over the course of 25 years Isak Niehaus reveals how the AIDS pandemic has been experienced at the village level Most significantly he shows how local cultural practices and values have shaped responses to the epidemic For example while local attitudes towards death and misfortune have contributed to the stigma around AIDS kinship structures have also facilitated the adoption and care of AIDS orphans Such practices challenge us to rethink the role played by culture in understanding and treating sickness with Niehaus showing how an appreciation of local beliefs and customs is essential to any effective strategy of AIDS treatment Overturning many of our assumptions on disease prevention the book is essential reading for practitioners as well as researchers in global health anthropology sociology epidemiology and scholars interested in public health and administration in sub Saharan Africa
