MORE EFFECTIVE LEADERSHIP Bolman and Deal s four frame model has been transforming business leadership for over 40
years Using a multidisciplinary approach to management this deceptively simple model offers a powerful set of tools for
navigating complexity and turbulence as the political and economic climate continues to evolve this model has never been
more relevant than today The Structural Frame explores the convergence of organizational structure and function and shows
why social architecture must take environment into account Case studies illustrate successful alignment in diverse
organizations and guidelines provide strategic insight for avoiding common pathologies and achieving the right fit The
Human Resource Frame dissects the complex dynamics at the intersection of people and organizations and charts the
leadership and human resource practices that build motivation and high performance The Political Frame shows how
competition conflict and the struggle for power and resources can be either a tool for growth or a toxic landmine for an
individual or organization Case studies show how both constructive and destructive practices influence social political and
economic trends both within and beyond organizational boundaries The Symbolic Frame defines organizational culture and
delves into the emotional and existential underbelly of social life It underscores the power of symbolic forms such as heroes
myths and rituals in providing the glue that bonds social collectives together The Seventh Edition has been updated with new

Since the use of poison gas during the First World War and the dropping of atomic bombs on Japan at the end of the Second
World War nuclear biological or chemical NBC weapons have registered high on the fears of governments and individuals

alike Recognising both the particular horror of these weapons and their potential for inflicting mass death and destruction much effort has been expended in finding ways to eliminate such weapons on a multi lateral level Based on extensive official archives this book looks at how successive British governments approached the subject of control and disarmament between 1956 and 1975 This period reflects the UK s landmark decision in 1956 to abandon its offensive chemical weapons programme a decision that was reversed in 1963 but never fully implemented and ends with the internal travails over the possible use of CR tear gas in Northern Ireland Whilst the issue of nuclear arms control has been much debated the integration of biological and chemical weapons into the wider disarmament picture is much less well understood there being no clear statement by the UK authorities for much of the period under review in this book as to whether the country even possessed such weapons or had an active research and development programme Through a thorough exploration of government records the book addresses fundamental questions relating to the history of NBC weapons programmes including the military economic and political pressures that influenced policy the degree to which the UK was a reluctant or enthusiastic player on the international arms control stage and the effect of international agreements on Britain s weapons programmes In exploring these issues the study provides the first attempt to assess UK NBC arms control policy and practice during the Cold War
