Heterarchy in World Politics Philip G. Cerny,2022-12-30 Heterarchy in World Politics challenges the fundamental framing of international relations and world politics IR theory has always been dominated by the presumption that world politics is at its core a system of states However this has always been problematic challengeable time bound and increasingly anachronistic In the 21st century world politics is becoming increasingly multi nodal and characterized by heterarchy the coexistence and conflict between differently structured micro and meso quasi hierarchies that compete and overlap not only across borders but also across economic financial sectors and social groupings Thinking about international order in terms of heterarchy is a paradigm shift away from the mainstream competing paradigms of realism liberalism and constructivism This book explores how since the mid 20th century the dialectic of globalization and fragmentation has caught states and the interstate system in the complex evolutionary process toward heterarchy These heterarchical institutions and processes are characterized by increasing autonomy and special interest capture The process of heterarchy empowers strategically situated agents especially agents with substantial autonomous resources and in particular economic resources in multi nodal competing institutions with overlapping jurisdictions The result is the decreasing capacity of macro states to control both domestic and transnational political economic processes In this book the authors demonstrate that this is not a simple breakdown of states and the states system it is in fact the early stages of a structural evolution of world politics This book will interest students scholars and researchers of international relations theory It will also have significant appeal in the fields of world politics security studies war studies peace studies global governance studies political science political economy political power studies and the social sciences more generally      *Autonomous Driving Changes the Future* Zhanxiang
