Visual Analysis Partum

Sara Cardona presents her 2009 art image Partum. Cardona is a local Dallas artist whom is a Dallas Community College Professor. Most of her art work is inspired by her childhood and life experiences. Women are the main focus point in her paintings. Cardona can very well relate to the women in her drawings being that they are a reflection of her own emotions (web).

Partum is a portrait of a woman with a shadow of vines covering her face. Her hair is pinned back with decorative butterflies, flowers, beads and corn, which represents her beauty. The woman's facial features is emphasized by the fine darkening of the pencil. She has the eyes of a teenage girl that has had her heart broken or have been through a traumatic experience.

The photo is made of mixed media both dry and wet. According to Cardona this art piece was created with simple office supplies, such as ink, ball point, white out, markers, thread and etc. The painting is drawn in two-dimensional media. This picture doesn't have too much texture but patterns dominate this portrait. The artist carefully drew natural patterns in the woman's hair. Cardona uses contour, calligraphic, directional, hatching lines to create this art work (pg24).

The lady in this image appears to have a blank stare upon her face. Her emotionless look gives the idea that she is hiding something. The thick vines covering

Get the Picture: Visual Literacy in Content-Area Instruction Marva Cappello, Nancy T. Walker, 2019-07-01 Visual sources are increasingly prevalent in today's society. This cross-curricular resource by Marva Cappello and Nancy T. Walker provides teachers with new and engaging strategies to help students closely read visual texts. Teachers will learn to evaluate the complexity of visual texts and match them to their students. Students will learn to analyze visual sources, understand both explicit and implicit messages, interpret underlying meaning, and engage in meaningful discussion. Based on practical research, this approach offers students engagement in the full suite of Language Arts as defined by the International Literacy Association and National Council of Teachers of English: reading, writing, listening, speaking, viewing, and visually representing. The strategies are divided by purpose: receptive and productive strategies, and arranged by content area to support all teachers. Sample lessons for grades K-1 and 2-3 are provided for each strategy. With concrete tools and techniques and a wide range of suggested visual texts to use in the classroom, teachers can prepare students for interaction with primary sources, digital media, and the visual-heavy world of 21st-century learning. Digital downloads of visual texts and student pages are included.

How Students Write: A Linguistic Analysis Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first-year student writing. *How Students Write* brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence-level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers, and ultimately learn to construct knowledge in their writing. Drawing on both first-year and upper-level student writing, the book examines the discourse of students at different points in their education. It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students' choices. In focusing on sentence-level features such as hedges, perhaps, and boosters, this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas. Attention to these features can help instructors foster civil discourse, design effective assignments, and expose and question norms of higher education.

Advances in the Visual Analysis of Social Movements Nicole Doerr, Alice Mattoni, Simon Teune, 2013-03-14 This special issue is a key text in the current study of social movements. It introduces new analytical concepts for understanding visuals in social movements and examines case studies from across the globe, such as analysis of the symbols used in the Egyptian uprising and contested images from anti-surveillance protests in Europe.

Fundamentals of Satellite Remote Sensing Emilio Chuvieco, 2009-12-01 An extensive review of remote sensing principles with an emphasis on environmental applications. *Fundamentals of Satellite Remote Sensing* discusses a wide range of topics from physical principles to data acquisition systems and on to visual and digital interpretation techniques. The text focuses on the interpretation and analysis of remote sensing images and how they improve our understanding of environmental processes and their interaction with human activities. The authors discuss new

interpretation approaches including hyperspectral analysis high spatial resolution data and radiative transfer models The presentation includes an analysis of accuracy assessment methods and demonstrates how to integrate remote sensing results with geographic information systems It also covers recent missions such as Terra Aqua Envisat Ikonos Quickbird Geoeye and SPOT 5 as well as LIDAR and interferometric radar The discussion of visual criteria to extract interpretation from satellite images emphasizes differences and similarities with conventional photo interpretation techniques A chapter on accuracy assessment and the connection between remote sensing and geographic information systems helps readers extend the interpretation of satellite images to a more operational applications oriented framework
