Neurobehavioral Toxicology: Neurological and Neuropsychological Perspectives, Volume I Stanley Berent, James W. Albers, 2012-10-12 This book the first of three volumes provides a thorough background to the emerging field of neurobehavioral toxicology by looking at current clinical approaches and tests as well as assessing current clinical research The analysis of the impact of toxins on the human nervous system is particularly pertinent given the ongoing expansion of pharmaceuticals industrial hazards biological warfare and global pollution A comprehensive introduction to neurobehavioral toxicology this work will be of interest to practicing neurologists and neuropsychologists as well as to occupational medicine physicians and medical toxicologists *Multicultural and Interreligious Perspectives on the Ethics of Human Reproduction* Joseph Tham, Alberto Garcia Gómez, John Lunstroth, 2022-01-03 This book includes a number of distinct religious and secular views on the anthropological ethical and social challenges of reproductive technologies in the light of human rights and in the context of global bioethics It includes contributions of bioethics experts from six major religions Buddhism Confucianism Christianity Islam Hinduism and Judaism as well as secular authors The chapters include commentaries discussing the content cross religious secular tradition to give a comparative perspective Not only the volume editors but also the contributing authors took part in reviewing each others chapter making this a unique collected volume not common in interreligious dialogue today This text appeals to researchers and students working in the fields of bioethics and religious secular studies *The Place of Emotion in Argument* Douglas Walton, 2010-11-01 **A Plea for Plausibility** John R. Welch, 2023-03-17 This book develops an original theory of decision making based on the concept of plausibility The author advocates plausible reasoning as a general philosophical method and demonstrates how it can be applied to problems in argumentation theory scientific theory choice risk management ethics law economics and epistemology Human decisions are conditioned by formidable uncertainty The standard resource for dealing rationally with uncertainty is the mathematical concept of probability The probability calculus is well known but since the numerical demands for applying it cannot usually be met it is not widely applicable By contrast the concept of plausibility is widely applicable but it is little known This book

relies on a generalized concept of plausibility whose strength is its adaptability The adaptability is due to a novel form of decision theory that takes plausibilities as inputs This form of decision theory remains applicable to decisions informed by sharp probabilities and utilities but it can also be applied to decisions that must be made without them It can aid in the rationally critical enterprise of discriminating good arguments from bad and this can foster philosophical progress A Plea for Plausibility will be of interest to scholars and advanced students working in argumentation theory philosophy of science ethics epistemology economics law and risk management

Responding to Crisis Dan Pyle Millar, Robert L. Heath, 2003-12-08 In recent years researchers and practitioners have explored the nature theory and best practices that are required for effective and ethical crisis preparation and response The consequences of being unprepared to respond quickly appropriately and ethically to a crisis are dramatic and well documented For this reason crisis consulting and the development of crisis response plans and protocols have become more than a cottage industry Taking a rhetorical view of crisis events and utterances this book is devoted to adding new insights to the discussion and to describing a rhetorical approach to crisis communication To help set the tone for that description the opening chapter reviews a rhetorical perspective on organizational crisis As such it raises questions and provokes issues more than it addresses and answers them definitively The other chapters can be viewed as a series of experts participating in a panel discussion The challenge to each of the authors is to add depth and breadth of understanding to the analysis of the rhetorical implications of a crisis as well as to the strategies that can be used ethically and responsibly Central to this analysis is the theoretic perspective that crisis response requires rhetorically tailored statements that satisfactorily address the narratives surrounding the crisis which are used by interested parties to define and judge it This volume will be of value to scholars and students interested in crisis communication and is certain to influence future work and research on responding to crises

Goal-based Reasoning for Argumentation Douglas Walton, 2015-08-25 Practical argumentation is intelligent reasoning from an agent's goals and known circumstances and from an action selected as a means to arrive at a decision on what action to take This book will appeal to a wide audience from designers of multi agent and robotics systems to social scientists

Argumentation Schemes for Presumptive Reasoning Douglas Walton, 2013-11-05 Recent concerns with the evaluation of argumentation in informal logic and speech communication center around nondemonstrative arguments that lead to tentative or defeasible conclusions based on a balance of considerations Such arguments do not appear to have structures of the kind traditionally identified with deductive and inductive reasoning but are extremely common and are often called plausible or presumptive meaning that they are only provisionally acceptable even when they are correct How is one to judge by some clearly defined standard whether such arguments are correct or not in a given instance The answer lies in what are called argumentation schemes forms of argument structures of inference that enable one to identify and evaluate common types of argumentation in everyday discourse This book identifies 25 argumentation schemes for presumptive reasoning and matches a set of critical questions to each These two elements the scheme and the questions are then used to evaluate a given argument in a particular case in relation to a context of dialogue in which the argument occurred In recent

writings on argumentation there is a good deal of stress placed on how important argumentation schemes are in any attempt to evaluate common arguments in everyday reasoning as correct or fallacious acceptable or questionable However the problem is that the literature thus far has not produced a precise and user friendly enough analysis of the structures of the argumentation schemes themselves nor have any of the documented accounts been as helpful accessible or systematic as they could be especially in relation to presumptive reasoning This book solves the problem by presenting the most common presumptive schemes in an orderly and clear way that makes them explicit and useful as precisely defined structures As such it will be an indispensable tool for researchers students and teachers in the areas of critical thinking argumentation speech communication informal logic and discourse analysis

Argumentative Writing in a Second Language Alan R. Hirvela, Diane Belcher, 2021-12-13 Argumentative Writing in a Second Language is a collection on teaching argumentative writing offering multiple vantage points drawn from the contributors own teaching and research experiences The value of learning how to compose argumentative texts cannot be overstated and yet very little attention has been allocated to the equally important topic of how argumentation is or can be taught in the L2 context Thus this volume shifts attention to teachers and argumentative writing instruction especially within increasingly common multimodal and digital literacy settings While doing so it provides a comprehensive wide ranging view of the L2 argumentative writing landscape within an instructional lens Part I of the volume is topic oriented and focuses on explorations of important issues and perspectives while Part II features several chapters reporting classroom based studies of a variety of instructional approaches that expand our understanding of how argumentative writing can be taught The book will be of value to pre service and in service teachers in varying instructional contexts as well as teacher educators and L2 writing scholars researchers
