

precedes it. Indeed, if the people, whose freedom is suppressed and who suffer, begin to moralize, what kind of moral assessments would they make? The answer is obvious: morality, which can somehow alleviate their fate, and such a morality happened to be Christian. The concept of “suffering for the greater good” teaches a man obedience, humility and, even worse, self-flagellation that his conscience dictates him to employ regularly. Not only does slave morality ascribe a person an incredible in its power belief in his own sinfulness, it also elevates his insignificant existence into a virtue. Who, if not oppressed, will fight with all his strength against power and might? “The slave’s eye is not favorable to the virtues of the powerful: he is skeptical and suspicious, *subtly* suspicious of all the “good” that is honored there – he would like to persuade himself that even their happiness is not genuine” (Solomon 78). This signifies the beginning of the opposition between “good” and “evil” in Nietzsche’s concept of controversial moralities of slaves and masters.

In the dichotomy of “good and evil”, the philosopher tries to actualize his new symbol of faith – the doctrine of the “will to power” and “the eternal returning of the same”. Being the substantive basis of both the person himself and all their stimuli and motives of behavior, the “will to power” carries their main features: striving for growth and improvement, an aspiration to rule their environment. The slave sees this will as “evil” – dangerous, selfish, and projects those feelings into the concept of power itself, proclaiming it sinful and unbecoming of a true believer. For the master, this pursuit of might is the main drive for development and domination, as it shapes his personality, sharpens it into a man above petty limitations of religious morals. The desire and ability to create, the will to step up and defend his views and opinions, are inherent to the nature of the master. “According to slave morality, those who are “evil” thus inspire fear: according to master morality it is precisely those who are “good” that inspire, and wish to inspire, fear, while the “bad” are felt to be contemptible” (Solomon 78). These traits constitute the philosopher’s ideal of triumphant self-assertion of the master morality.

In fact, master morality is the morality of a creative person, whose will is strong. Both the will and desire liberate a man: for to want is to create, as teaches Nietzsche. In *The Gay Science*, he proclaims that the God is dead,

'Malleable at the European Will': British Discourse on Slavery (1784-1824) and the Image of Africans Helmut Meier, 2019-05-30 Helmut Meier's study of pro and anti slavery texts from 1784-1825 focuses on understanding the distinct image of Africans in the British debate on the slave trade and slavery as such Starting from the premise that at the threshold from the early to the late modern period the distinct image of Africans as slaves was instrumental in universalizing a Eurocentric concept of capitalist wage labor both at the colonial centres and margins Meier argues that by portraying African slaves as suffering wretches especially anti slavery texts created colonial Others in an indistinct zone between inclusion and exclusion from humanity The discourse on slavery thus constructs African slaves as mimetic Others which could subsequently become the objects of a discourse of colonial reform and betterment

Teaching Olaudah Equiano's Narrative Eric D. Lamore, 2012-11-30 The Interesting Narrative of the Life of Olaudah Equiano or Gustavus Vassa the African Written by Himself 1789 is one of the most frequently and heatedly discussed texts in the canon of eighteenth century transatlantic literature written in English Equiano's Narrative contains an engrossing account of the author's experiences in Africa the Americas and Europe as he sought freedom from bondage and became a leading figure in the abolitionist movement While scholars have approached this sophisticated work from diverse critical and historical biographical perspectives there has been until now little written about the ways in which it can be successfully taught in the twenty first century classroom In this collection of essays most of them never before published sixteen teacher scholars focus explicitly on the various classroom contexts in which the Narrative can be assigned and various pedagogical strategies that

can be used to help students understand the text and its complex cultural intellectual literary and historical implications The contributors explore topics ranging from the religious dimensions of Equiano s rhetoric and controversies about his origins specifically whether he was actually born in Africa and endured the Middle Passage to considerations of the Narrative s place in American Literature survey courses and how it can be productively compared to other texts including captivity narratives and modern works of fiction They not only suggest an array of innovative teaching models but also offer new readings of the work that have been overlooked in Equiano studies and Slavery studies With these two dimensions this volume will help ensure that conversations over Equiano s eighteenth century autobiography remain relevant and engaging to today s students ERIC D LAMORE is an assistant professor of English at the University of Puerto Rico at Mayag ez A contributor to The Greenwood Encyclopedia of American Poets and Poetry he is also the coeditor with John C Shields of New Essays on Phillis Wheatley

Abolitionism and American Law John R. McKivigan, 1999 This volume s essays reveal that the abolitionists impact on United States law and the Constitution did not end with the Civil War The immediate postwar Reconstruction amendments were both rooted in the radically anti positivistic natural rights philosophy long espoused by the radical political abolitionists Implementing protection for black civil rights however proved much more difficult

Readings in Writing Courses Richard C. Raymond, 2010-12-01 As the title suggests this six chapter book responds to a question which in Western culture goes back to Plato Aristotle Cicero and Quintilian namely What should rhetoric teachers ask their students to read Primarily historical the first two chapters trace conflicting answers to the question above focusing on two constructive results of the debate the re invention of rhetoric and writing as a discipline a coherent and growing body of knowledge and as a result the emergence of independent departments of writing free from departments of English free therefore to develop their own curriculum and to manage their own budgets Additionally the second chapter examines two destructive consequences of this debate the ban of literature from writing courses where students might profitably study both and as a result the often painful departmental splits which not only separate former colleagues but also cramp the pedagogy of those trained to teach both writing and literature More than a survey of key publications this chapter encourages readers to honor the discipline of rhetoric but to make a place for literature on their composition syllabi The next four chapters provide pedagogical support for these chief claims that literature can and should be taught in writing courses and that such readings need not distract students from the primary text their own writing On the contrary these readings motivate serious writing when students feel invited into a conversation on issues that touch their lives These pedagogical chapters then move entering professionals from the theoretical debate to the application of theory therefore the book would

serve well professors of courses in composition theory particularly those who enjoy teaching the conflicts and preparing their graduate students to design assignments and courses that apply theories of learning reading and composing *Longman Companion to Slavery, Emancipation and Civil Rights* Harry Harmer,2014-06-11 This Companion provides the essential background to the defining fate of the African diaspora in the Americas and the Caribbean from the 15th to the 20th centuries Central to the book are detailed chronologies on the development and decline of the slave trade slavery in colonial North and South America the Caribbean and the United States movements for emancipation and the progress of black civil rights Separate sections look at the long running resistance against slavery and the black civil rights movements in the Americas and the Caribbean with a comparative chronology of apartheid in South Africa Supported by biographies of over 100 key individuals and a full glossary providing definitions of crucial terms expressions ideas and events this is required reading for anyone interested in the historical experience of slavery **Encyclopedia of Women and Religion in North America, Set** Rosemary Skinner Keller,Rosemary Radford Ruether,Marie Cantlon,2006-04-19 A fundamental and well illustrated reference collection for anyone interested in the role of women in North American religious life
