

Pet Architecture

And how to Use it

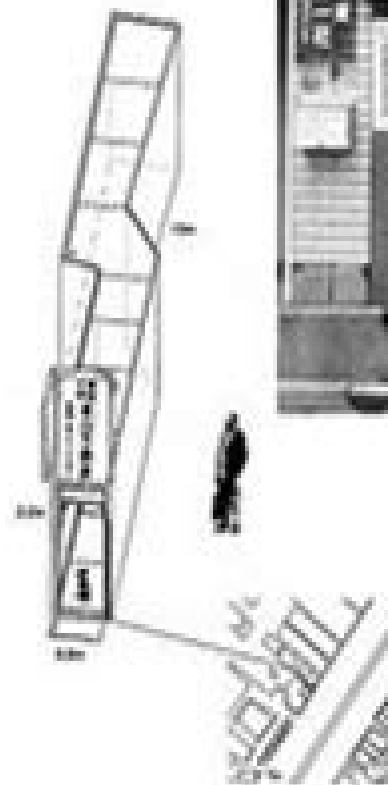

TOSHIHARU TSUKAMOTO

When we walk on the streets of Tokyo we find amazingly small buildings between streets, along railroad tracks, and in the spaces between tracks and streets. Most of these buildings are cheaply built, and therefore not spectacular in design, and they do not use the latest best of technology.

However, they attract us. I may be because their presence produces a relaxed atmosphere, and makes us feel relaxed. Their shapes and forms that do not conform to styles and perceptions are interesting to our eyes. They illustrate unique ideas with elements of fun without putting in unreasonable conditions such as small price, size and width.

Their livable presence reminds me of something I thought when one day I realized that they are the pets. Our society does not consist only of human beings. Various animals come into our lives as 'pets', and they are given spaces to live. It may be for our own convenience, but playing with pets is a lot of fun. It is said that communicating with pets reduces many people psychologically. It is because they feel a totally different existence from us who stand on two feet, wear clothes and speak words. This play is quite good for our mental health since pets are not subjects of direct comparison to us, human beings. In other words, if decent buildings standing in decent spaces are to be considered 'human beings', small buildings standing with all their might in odd spaces would seem to be the pets in urban spaces, due to the nature of distance from human beings and the sense of presence necessary. If we think this way, we are able to enjoy many different kinds of buildings. As a result, we have decided to call small buildings 'Pet Architecture', those that are smaller than 'urban houses' (a term used to make fun of small houses in Tokyo and bigger than doghouses). We show the existence of pets in the jungle of buildings, as there are pets in the worlds of human beings.

By giving this title, we aimed to establish one new category in urban culture by going from a certain name and not by negatively considering them as openings and fragility. I have tentatively talked about this concept to different people and, surprisingly, found that many of them tell me about their 'My Pet Architecture' existing in their daily lives.

Pet Architecture Guide:

Pet architecture guide book Kesaharu Imai, 2001 Pet architecture is a term for the buildings that have been squeezed into left over urban spaces Curious shapes and inventive solutions for drainage windows and air conditioning abound Most of all it is the extraordinary miniature size of these shacks store rooms sushi bars and bike shops which makes this project so fresh Lovingly researched by a team of very young Japanese architects each pet includes a humorous description full page photograph a map and 3d sketch

38 South Nigel Bertram, Shane Murray, 2005 38 south is the document of record for urban focused architectural research from the School of Architecture and Design at RMIT University In this issue the publication assumes its new role of presenting research from the Urban Architecture Laboratory The UAL was established in 2002 with the explicit aim of providing a specialised research environment for intensive and focussed architectural research that engages with contemporary urban issues This edition of 38 south is a progress report on the activities of UAL over its first two and a half years As such this body of work from candidates in the program provides both reflective and prospective interpretations of our evolving understanding of the role that the laboratory can play

Ed Furniture, Structure, Infrastructure Nigel Bertram, 2017-03-02 Observation and analysis are types of invention They make things apparent which perhaps were invisible By noticing drawing and naming something we bring it into being On the other hand building and making can be thought of as analytical observations pointing out what had not been so clear before and revealing the potential for other actions yet to occur This book is a collection of urban research and architectural projects by award winning architects Nigel Bertram NMBW Architecture Studio using observation as a design tool and design as an observational method Through this process a position on the making of architecture and on the role of architecture within the wider urban environment is established embracing the full messy reality of the present finding delight in the everyday and developing sensitivity to a range of found environments By taking pre existing conditions seriously each project architectural or analytical large or small becomes understood as the strategic renovation of a continuing state This method of working operates by thinking simultaneously at different scales from furniture to structure and infrastructure searching for combinations of what might normally be separated into different categories moving between the many small and ad hoc actions of individuals to wider systems of collective organisation Thinking about the effects of small moves on the larger urban field and vice versa the role of unplanned or uncontrolled events in relation to the inward focus of design thinking about the combinatory effect of what is newly made with what is already there for example enables architecture and the city to be understood in relative terms in terms of relationships Between people groups of people things and parts of things actions and groups of actions urban architecture is the social arrangement of activity with the physical arrangement of large and small parts of its environment But what people do also changes the place in which they do it Considering different scales and types of relationships between individuals and groups insiders and outsiders expected and unexpected actions can be a

way of crossing categories and establishing new relations Breaking down components of a given situation or brief before re grouping can be used to flatten and redistribute hierarchies embedded within Similarly finding ways of carefully observing things just as they are in the present helps to see around the presuppositions of familiarity without worrying about cause or effect These aims techniques and thoughts are presented through the discipline of the architectural project where precise strategies must in the end be found to define an exact physical arrangement and materiality usually at minimum cost This collection of works researches the manner in which such precision can also generate openness and indeterminacy allowing and provoking the engagement of others

Seeing and Making in Architecture Taiji Miyasaka, 2013-08-22 You always aim to achieve that moment of insight that leads to ingenuity and novelty in your design but sometimes it remains elusive This book presents a variety of techniques for mapping and making hands on design build projects and relates this work to real architecture It helps you to learn new ways of seeing and making that will enhance your creative design process and enable you to experience moments that lead to ingenuity in design Each of the book's two parts Seeing and Making is organized according to technique which ranges from quantitative analysis and abstraction to pattern and scale to provide you with a framework for mapping and hands on exercises Interviews with architects Yoshiharu Tsukamoto Atelier Bow Wow and Jesse Reiser and Nanako Umemoto Reiser Umemoto give you perspective on using these exercises in practice

Architecture Against the Post-Political Nadir Lahiji, 2014-05-23 Written by a team of renowned contributors and carefully edited to address the themes laid out by the editors in their introduction the book includes theoretical issues concerning the questions of aesthetics and politics and addresses city and urban strategies within the general critique of the post political By focusing on specific case studies from Warsaw Barcelona Dubai Tokyo and many more the book consolidates the contributions of a diverse group of academics architects and critics from Europe the Middle East and America This collection fills the gap in the existing literature on the relation between politics and aesthetics and its implications for the theoretical discourse of architecture today In summary this book provides a response to the predominant de politicization in academic discourse and is an attempt to re claim the abandoned critical project in architecture

Decoding Theoryspeak Enn Ots, 2010-09-20 Existentialism Urbanism Aporia Deontic Tabula Rasa Hyperspace Heterotopia Metareality Structuralism What does it all mean The unique language used in architectural theory both in speech and writing can appear daunting and confusing particularly to new architectural students Decoding Theoryspeak provides an accessible guide to the specialized language of contemporary design for the next generation of thinkers architects and design leaders It includes definitions of over 200 terms clear cross references illustrations throughout It is an essential pocket sized resource for students and practitioners alike

The Fractal Dimension of Architecture Michael J. Ostwald, Josephine Vaughan, 2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century's most respected and

celebrated architects Including designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world s most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design The Urban Housing Handbook Eric Firley,Victor Deupi,2023-08-21 THE URBAN HOUSING HANDBOOK An insightful and revealing look at the intersection of housing and urban design In the newly revised Second Edition of The Urban Housing Handbook Eric Firley and Victor Deupi deliver a vital design and analysis tool for housing practitioners students and researchers The book outlines the characteristics of 30 of the most notable housing types from around the world studied against a background of increasing densification Each of the 30 chapters includes a fully explored tradi tional example followed by one or two contemporary projects of similar spatial configuration that address changing trends in architecture and urban design For this latest edition all contemporary examples have been updated and are now presented on two full spreads per chapter Other features include A rigorous analytical method that classifies the types according to four main categories courtyard houses row houses compounds and apartment buildings A thorough introduction to the relationship between an individual housing unit and the urban fabric that it creates through repetition A strong focus on dense metropolitan projects from around the world A set of key figures that translate visual information into metrics Unique original drawings of illustrated housing accompanied by aerial and street level context photos Conceived for architects and urban designers The Urban Housing Handbook is also an ideal resource for urban planners housing developers builders and housing trust professionals Behaviorology Atorie Wan,2010 Achieving near cult status among architectural students around the world Yoshiharu Tsukamoto and Momoyo Kaijima of Atelier Bow Wow have built a career confronting the challenges posed by dense urban environments Design Research in Architecture Murray Fraser,2021-07-28 What is the role of design research in the types of insight and knowledge that architects create That is the central question raised by this book It acts as the introductory overview for Ashgate s major new series Design Research in Architecture which has been created in order to establish a firm basis for this emerging field of investigation within architecture While there have been numerous architects scholars since the Renaissance who have relied upon the interplay of drawings models textual analysis intellectual ideas and cultural insights to scrutinise the discipline nonetheless until recently there has been a reluctance within architectural culture to acknowledge and accept the role of design research as part of the discourse However in many countries around the world one of the key changes in

architecture and architectural education over the last decade has been the acceptance of design as a legitimate research area in its own right and this new series provides a forum where the best proponents of architectural design research can publish their work This volume provides a broad overview on design research that supports and amplifies the different volumes coming out in the book series It brings together leading architects and academics to discuss the more general issues involved in design research At the end there is an Indicative Bibliography which alludes to a long history of architectural books which can be seen as being in the spirit of design research *Technonatures* Damian F. White,Chris

Wilbert,2010-04-05 Environmentalism and social sciences appear to be in a period of disorientation and perhaps transition In this innovative collection leading international thinkers explore the notion that one explanation for the current malaise of the politics of ecology is that we increasingly find ourselves negotiating technonatural space times International contributors map the political ecologies of our technonatural present and indicate possible paths for technonatural futures The term technonatures is in debt to a long line of environmental cultural theory from Raymond Williams onwards problematizing the idea that a politics of the environment can be usefully grounded in terms of the rhetoric of defending the pure the authentic or an idealized past solely in terms of the ecological or the natural In using the term technonatures as an organizing myth and metaphor for thinking about the politics of nature in contemporary times this collection seeks to explore one increasingly pronounced dimension of the social natures discussion Technonatures highlights a growing range of voices considering the claim that we are not only inhabiting diverse social natures but that within such natures our knowledge of our worlds is ever more technologically mediated produced enacted and contested **Learning from the Japanese City** Barrie

Shelton,2012-05-23 Japanese cities are amongst the most intriguing and confounding anywhere Their structures patterns of building and broader visual characteristics defy conventional urban design theories and the book explores why this is so Like its cities Japan s written language is recognized as one of the most complicated and the book is unique in revealing how the two are closely related Set perceptively against a sweep of ideas drawn from history geography science cultural and design theory *Learning from the Japanese City* is a highly original exploration of contemporary urbanism that crosses disciplines scales time and space This is a thoroughly revised and much extended version of a book that drew extensive praise in its first edition Most parts have stood the test of time and remain A few are replaced or removed about a hundred figures appear for the first time Most important is an entirely new sixth section This brings together many of the urban characteristics otherwise encountered in fragments through the book in one walkable district of what is arguably Japan s most convenient metropolis Nagoya The interplay between culture built form and cities remains at the heart of this highly readable book while a change in subtitle to *Looking East in Urban Design* reflects increased emphasis on real places and design implications

Pyrotechnic Cities Liam Ross,2022-06-24 This book explores the relationship between architecture government and fire It posits that through the question of fire safety standardisation building design comes to be both a problem for and a tool of

government Through a close study of fire safety standards it demonstrates the shaping effect that architecture and the city have on the way we think about governing Opening with an investigation into the Grenfell Tower fire and the political actors who sought to enrol it in programmes of governmental reform before contextualising the research in current literature the book takes four city studies each beginning with a specific historic fire The 1654 Great Fire of Meirecki Edo the 1877 town fire of Lagos the 1911 Empire Palace Theatre fire Edinburgh and the 2001 World Trade Centre attack New York Each study identifies the governmental response to the fire safety standards and codes designed in its wake and how these new processes spread and change Drawing on the work of sociologists John Law and Anne Marie Mol and their concept of Fire Space it describes the way that architectural design through the medium of fire is an instrument of political agency Pyrotechnic Cities is a critical investigation into these political implications written for academics researchers and students in architectural history and theory infrastructure studies and governance **The Skira Yearbook of World Architecture** Luca Molinari,2008 POP-UP HOTEL REVOLUTION, the architectural innovation about to come in the hotel industry Joseph Di Pasquale,Chiara Butta,Paola Zatti,2015 WHICH IS MOVING PEOPLE OR ARCHITECTURE In an era where nomadism is the keyword that relates people to the rest of the world architecture is seeking for a concrete response to the recent needs result of the rise of mobility and worldwide travels The proposal of new modular structures for the hospitality market defines the tendency to think movable modular flexible *Lesson guide for captioned films, XX ,1984*
