

PART 8: MAINTENANCE AND SERVICE

Vehicle Loading

WARNING! The components of your vehicle are designed to provide satisfactory service if the vehicle is not loaded in excess of either the gross vehicle weight rating (GVWR) or the maximum front and rear gross axle weight ratings (GAWRs). Axle weight ratings are listed on the driver's door edge. Supervise all loading to ensure that (1) the Gross Vehicle Weight Rating (GVWR) is not exceeded and (2) the load is distributed correctly so that the weight distribution is within the limits of the front and rear axle load ratings. Severe damage to your vehicle, difficult handling, or an accident could occur if your vehicle is not loaded properly.

GVW: GVW is the Gross Vehicle Weight. This is the TOTAL WEIGHT your vehicle is designed to carry. Never carry so heavy a load that you exceed the GVW rating of your Peterbilt vehicle.

Axle Weight: Your front and rear axles are rated according to the load they are designed to carry. You will find this number listed on the driver's door frame.

Load Distribution: Be sure any load you carry is distributed so that no axle has to support more than its load limit.

WARNING! An unevenly distributed load or a load too heavy over one axle can affect the braking and handling of your vehicle and cause an accident. Even if your load is under the legal limits, be sure it is distributed evenly.

Example Of Weight Distribution
