Solidworks Api Manual Selection:

SolidWorks API Series 1: Programming & Automation Luke Malpass,2014-01-11 The first in the series of books on programming of the SolidWorks CAD software is here Shipping to anywhere in the world If you are new to programming or a seasoned developer this book suits all levels Covering VBA C and VB Net this is the only book you will need to know everything you need about the SolidWorks API

SolidWorks API Series 1: Advanced Product Development Luke Malpass,2014-01-11 Second in a series of highly popular books focusing intensively on the SolidWorks API programming toolset Firstly this book is written with the presumption that the reader has adequate knowledge of SolidWorks API programming either from experience or from reading my previous book and so complete beginners may struggle as basic steps are overlooked This book focuses a lot more on hardcore API programming techniques and methods focused around the add in and PMP area of SolidWorks Purely Net no VBA this time folks As well as covering the API we go ten steps further and move on to something I have personally never found in any programming book on the market presumably because those who have the knowledge do not wish to share it actual real world product development step by step from concept to design and testing onto licensing installation sales distribution and marketing After all is that not where this journey is meant to lead The topics covered will include SolidWorks Add ins in process coding vs Standalone planning and production the development of a fully functioning complex event and notification hooked add in application creating your very own installer software that installs your add in and registers it with COM then creates desktop start menu shortcuts and much more You will even be taught on using Photoshop CS4 to create a logo and packaging for your product ready for sale This book is truly a full product lifecycle journey and beginners right through to industry pro s will learn a thing or two from at least one chapter
