With this book you can make your photography professional. You can learn basic and advanced photography easily. By Gaurav Kumar asylumgaurav *Practical Astrophotography* Jeffrey R. Charles, 2012-12-06 Almost all amateur astronomers want to take photographs of the night sky. For all but the simplest star trail pictures this involves machinery: a telescope drive to track the stars essential to compensate for the rotation of the earth. The task becomes even more complicated when photographing very small or very faint objects that require high magnification or very long exposure times. Amateurs have many options according to their requirements: technical ability and budget. *Astrophotography for Amateurs* looks at all the possibilities including normal wet photography, CCD imaging and modern techniques of computer enhancement. There are sections about photographing different classes of astronomical object from the Moon to faint nebulae as well as a thorough look at the equipment needed. Based on more than two decades of offshore experience and a decade of supplying MMO and PAM services commercially and scientifically, the Handbook is a long overdue reference guide that seeks to improve standards worldwide for marine operations such as seismic and drilling exploration, wind farm and civil engineering, piling, dredging, trenching, rock dumping, hydrographical surveys and military defence exercises. By popular request, this manual will also form an accompaniment to MMO and PAM courses. The Handbook consolidates all aspects of this discipline into one easily accessible resource to educate all stakeholders: e.g. MMOs, PAM operators, suppliers, recruitment agencies, clients, contractors, regulators, NGOs, consultants, scientists, academia and media, regardless of experience. Topics include worldwide legislation, compliance, anthropogenic noise sources and potential effects, training, offshore life, visual and acoustic monitoring theory and practice, marine mammal distribution, hearing and vocalisations and report writing. Advice is provided on implementing sensible and practical mitigation techniques, appropriate technologies, data collection, client and regulator liaison and project kick-off meetings.
