Farms with a Future Rebecca

Thistlethwaite,2012 Do you want to make your farm more dynamic profitable and above all sustainable Thistlethwaite introduces readers to some of the country s most innovative farmers in order to help you build a triple bottom line farming business focused on economic viability social justice and ecological soundness **Meat** Simon Fairlie,2010-12-17 Meat A Benign Extravagance is a groundbreaking exploration of the difficult environmental ethical and health issues surrounding the human consumption of animals Garnering huge praise in the UK this is a book that answers the question should we be farming animals or not Not a simple answer but one that takes all views on meat eating into account It lays out in detail the reasons why we must indeed decrease the amount of meat we eat both for the planet and for ourselves and yet explores how different forms of agriculture including livestock shape our landscape and culture At the heart of this book Simon Fairlie argues that society needs to re orient itself back to the land both physically and spiritually and explains why an agriculture that can most readily achieve this is one that includes a measure of livestock farming It is a well researched look at agricultural and environmental theory from a fabulous writer and a farmer and is sure to take off where other books on vegetarianism and veganism have fallen short in their global scope *Holy Shit* Gene Logsdon,2010-08-30 In his insightful book Holy Shit Managing Manure to Save Mankind contrary farmer Gene Logsdon provides the inside story of manure our greatest yet most misunderstood natural resource He begins by lamenting a modern society that not only throws away both animal and human manure worth billions of dollars in fertilizer value but that spends a staggering amount of money to do so This wastefulness makes even less sense as the supply of mined or chemically synthesized fertilizers dwindles and their cost skyrockets In fact he argues if we do not learn how to turn our manures into fertilizer to keep food production in line with the increasing population our civilization like so many that went before it will inevitably decline With his trademark humor years of experience writing about both farming and waste management and uncanny eye for the small but important details Logsdon artfully describes how to manage farm manure pet manure and human manure to make fertilizer and humus He covers the field so to speak discussing topics like How to select the right pitchfork for the job and use it correctly How to operate a small manure spreader How to build a barn manure pack with farm animal manure How to compost cat and dog waste How to recycle toilet water for irrigation purposes and How to get rid ourselves of our irrational paranoia about feces and urine Gene Logsdon does not mince words This fresh fascinating and entertaining look at an earthy but absolutely crucial subject is a small gem destined to become a classic of our agricultural literature Gene Logsdon in his naughty and inimical style has captured the essence of soil building pathogen control food ecology and farm economics by explaining the elegantly simple symbiosis between manure and carbon What a great addition to the eco food and farming movement Read and heed Joel Salatin Author of You Can Farm and The Sheer Ecstasy of Being a Lunatic Farmer *The Organic Farmer's Business Handbook* Richard Wiswall,2009-09-30 Publisher s description *The Winter Harvest Handbook* Eliot Coleman,2009 Celebrated farming expert Coleman continues to lead the way in organic gardening pushing the limits of the

harvest season while working his world renowned organic farm in Harborside Maine A Sanctuary of Trees Gene Logsdon, 2012 Whether as an adolescent studying at a seminary or as a journalist living just outside Philadelphia's city limits Gene has always lived and worked close to the woods and his curiosity and keen sense of observation have taught him valuable lessons about a wide variety of trees their distinct characteristics and the multiple benefits and uses they have In addition to imparting many fascinating practical details of woods wisdom A Sanctuary of Trees is infused with a philosophy and descriptive lyricism that is born from the author's passionate and lifelong relationship with nature There is a point at which the tree shudders before it begins its descent Then slowly it tips picks up speed often with a kind of wailing death cry from rending wood fibers and hits the ground with a whump that literally shakes the earth underfoot The air in the aftermath seems to shimmy and shiver as if saturated with static electricity A Solar Buyer's Guide for the Home and Office Stephen Hren, Rebekah Hren, 2010 Solar power once a fringe effort limited to DIY enthusiasts is now fast becoming mainstream and many home and business owners are curious about solar electric and solar thermal systems and want to find out how to go about getting a clean energy generation system of their own The market for solar systems has been growing at an exponential rate even in a sluggish economy but many are held back by widespread confusion about the technology This book clears the air allowing property owners to move forward with confidence to make their buildings comfortable environmentally sound and secure against wild swings in energy prices *Letter to a Young Farmer* Gene Logsdon, 2017-01-26 In the midst of our epidemic fear of the future and its so far predicted emergencies and catastrophes here is Gene patiently quietly with the right touch of merriment talking about the small really possible ways of solving our one great problem how to live on the Earth without destroying it Wendell Berry from the foreword For more than four decades the self-described contrary farmer and writer Gene Logsdon has commented on the state of American agriculture In *Letter to a Young Farmer* his final book of essays Logsdon addresses the next generation young people who are moving back to the land to enjoy a better way of life as small scale garden farmers It's a lifestyle that isn't defined by accumulating wealth or by the get big or get out agribusiness mindset Instead it's one that recognizes the beauty of nature cherishes the land respects our fellow creatures and values rural traditions It's one that also looks forward and embraces right technologies including new and innovative ways of working smarter not harder and avoiding premature burnout Completed only a few weeks before the author's death *Letter to a Young Farmer* is a remarkable testament to the life and wisdom of one of the greatest rural philosophers and writers of our time Gene's earthy wit and sometimes irreverent humor combines with his valuable perspectives on many wide ranging subjects everything from how to show a ram who's boss to enjoying the almost churchlike calmness of a well built livestock barn Reading this book is like sitting down on the porch with a neighbor who has learned the ways of farming through years of long observation and practice Someone in short who has seen it all and has much to say and much to teach us if we only take the time to listen and learn And Gene Logsdon was the best kind of teacher

equal parts storyteller idealist and rabble rouser His vision of a nation filled with garden farmers based in cities towns and countrysides will resonate with many people both young and old who long to create a more sustainable meaningful life for themselves and a better world for all of us Sagacious and sly practical and poetic Logsdon s voice may have been contrarian but it was never condescending Booklist **Gene Everlasting** Gene Logsdon,2014-01-24 Author Gene Logsdon whom Wendell Berry once called the most experienced and best observer of agriculture we have has a notion That it is a little easier for gardeners and farmers to accept death than the rest of the populace Why Because every day farmers and gardeners help plants and animals begin life and help plants and animals end life They are intimately attuned to the food chain They understand how all living things are seated around a dining table eating while being eaten They realize that all of nature is in flux Gene Everlasting contains Logsdon s reflections by turns both humorous and heart wrenching on nature death and eternity all from a contrary farmer s perspective He recounts joys and tragedies from his childhood in the 1930s and 40s spent on an Ohio farm through adulthood and child raising all the way up to his recent bout with cancer always with an eye toward the lessons that farming has taught him about life and its mysteries Whether his subject is parsnips pigweed immortality irises green burial buzzards or compound interest Logsdon generously applies as much heart and wit to his words as he does care and expertise to his fields **Media Art and the Urban Environment** Francis T.
