The Green Investment Bank Great Britain: Parliament: House of Commons: Environmental Audit Committee,Joan Walley,2011-03-11 This report warns that the UK could lose out on hundreds of billions of pounds of vital investment in green energy projects if the Government waters down its plans for a Green Investment Bank The Coalition Agreement promised to establish a Green Investment Bank and the Chancellor pledged 1 billion to capitalise it in the Spending Review plus unspecified proceeds from the sale of government assets But there have been reports of disagreement within Government as to whether it should be a fully fledged investment bank able to borrow money and raise further capital or simply a fund If the Office for National Statistics ONS classifies the Bank as public sector its borrowing could appear on the Government s balance sheet and so undermine its deficit reduction strategy Evidence presented to the Environmental Audit Committee by energy companies NGOs and financial institutions suggests that between 200 billion and 1 trillion of private sector investment is needed over the next 10 20 years if the UK is to meet its climate change and renewable energy targets But traditional sources of private sector capital are only likely deliver 50 80 billion of investment in green infrastructure by 2025 leaving the UK with a massive investment shortfall The report argues that establishing a proper Investment Bank is crucial in order to lever in the unprecedented levels of private sector investment needed The Committee concludes that as a priority the Bank should concentrate on new fledgling environmental investment where the market has yet to be established

Electron Microscopy of Nanotubes Zhong-lin

Wang,Chun Hui,2013-11-27 Research in carbon nanotubes has reached a horizon that is impacting a variety of fields such as nanoelectronics flat panel display composite materials sensors nanodevices and novel instrumentation The unique structures of the nanotubes result in numerous superior physical and chemical properties such as the strongest mechanical strength the highest thermal conductivity room temperature ballistic quantum conductance electromechanical coupling and super surface functionality Several books are available that introduce the synthesis physical and chemical properties and applications of carbon nanotubes Among the various analytical techniques high resolution transmission electron microscopy

HRTEM has played a key role in the discovery and characterization of carbon nanotubes. It may be claimed that carbon nanotubes might not have been discovered without using HRTEM. There is a great need for a book that addresses the theory, techniques and applications of electron microscopy and associated techniques for nanotube research. The objective of this book is to fill this gap. The potential of HRTEM is now well accepted in wide ranging communities such as materials science, physics, chemistry and electrical engineering. TEM is a powerful technique that is indispensable for characterizing nanomaterials and is a tool that each major research institute must have in order to advance its research in nanotechnology.

The history of public enterprises is not new. They have been assigned the role of harbinger of socialism in India in accordance with the Industrial Policy Resolution of 1956. They are treated as the catalysts of economic development and social upliftment of the people. For pretty a long time public enterprises have been in dock and dottage on the ground that they have not been able to deliver goods as per our expectations. With a huge amount of investment in the central sector and the states sector taken together these enterprises have failed to generate a dependable surplus. Public sector is an amalgam of Central and State enterprises. In this book we have established that the state's enterprises commitments are no less than central enterprises to fulfil the objectives and expectations with which they were allotted the commanding height in our economy. A macro level study of all types of State level public undertakings has been done to judge the efficiency and effectiveness of these enterprises. This book is unique in the sense that it covers the syllabus of M A B A Hons and B A Pass courses of all the universities of Bihar and special paper as Public Enterprises in other universities of India.
