WALNECK'S CLASSIC CYCLE TRADER, APRIL 2005 Causey Enterprises, LLC, **Innovating for Sustainability** Luca Berchicci, 2008-09-03 One of the challenges met by green entrepreneurs and product developers who have tried to develop more sustainable products is that efforts to have better products in environmental terms do not always translate into effective business cases The purpose of this book is a better understanding of the implications of environmental issues in new product development Through an empirical study in the human powered vehicle sector Luca Berchicci examines how and to what extent the environmental ambition of product developers and managers influences the way new products and services are developed The understanding of this phenomenon is particularly important since managers are encouraged and or motivated to undertake environmental new product development projects From the descriptions and

analyses of the two cases study Luca Berchicci suggests that a high level of environmental ambition increases the complexity of the product innovation process Moreover a high level of environmental ambition may hamper a product innovation process because it may lead the developers away from the market that their product is to serve Accordingly this book attempts to explain and predict how environmental ambition influences new product development processes This claim provides a theoretical contribution to existing research in both product innovation and green product innovation Moreover this book provides an original and deep insight on the diverse facets of greening

Transition and Coherence in Intellectual Property Law Niklas Bruun, Graeme B. Dinwoodie, Marianne Levin, Ansgar Ohly, 2021-01-07 The nature and content of intellectual property IP law which is heavily contingent on the state of technology and on social and market developments has always been subject to ongoing transitions How those transitions are effected and the shape they take is crucial to the ability of IP to achieve its stated goals and provide the necessary climate for investment in creativity innovation and brand differentiation Yet the need for change can run headlong into a desire for coherence A search for coherence tests the limits of the concept of intellectual property is imperiled by overlaps between different IP regimes and calls for a unifying normative theme This volume assembles contributors from across IP and the globe to explore these questions including whether coherence is desirable It should be read by anyone interested in understanding the conceptual underpinnings of one of the most important and dynamic areas of the law
