Otaibi, Mousa Asiri, Pressure injuries also referred to as pressure ulcers or bedsores constitute a major healthcare problem that affects patients during a stay in a hospital long term care facility and even in home care settings Pressure injuries due to prolonged pressure on the skin and underlying tissues not only cause physical pain and suffering but emotional suffering and impaired quality of life in patients too Innovative approaches development of effective guidelines quality improvement initiatives that prevent pressure injuries and treat them if they arise is key to protect the well being and health of the patients But the expense of these practices not just their direct monetary outlay but their systemic costs to economy and environment is hardly a consideration These can be direct costs such as medical supplies specialty equipment employee training or extended hospitalizations that accumulate rapidly and place added burden on healthcare systems and institutions This book explores the unique cost of pressure injury prevention and treatment in many forms We aim to examine how these injuries uniquely affect finances from the early prevention oriented phase to the advanced and complicated high tech and high cost wound care to rehabilitation Through this lens we hope to underscore the need for careful consideration of the trade offs between the goal of providing full coverage and the imperative of needing health care resources to be sustainable This book shares detailed analysis case studies and expert insights that help readers understand the complex financial and clinical issues related to pressure injury care Most importantly it stimulates thinking on how best to enhance individual
