Small, Medium, Large, Extra-large Rem Koolhaas, Bruce Mau, Jennifer Sigler, Hans Werlemann, 1995 Overzicht van uitgevoerd werk en ontwerpen van Rem Koolhaas 1944 en zijn architectenbureau OMA **Small, Medium, Large, Extra-large** Jennifer Sigler, 1997 Narrating Architecture James Madge, Andrew Peckham, 2006-09-27 This anthology brings together the best and most interesting papers from the first ten years of The Journal of Architecture published together for the first time in a single volume Covering a wide range of topics of central importance to architecture today the papers also address the related topics to which architecture and architectural studies are inextricably linked The invited authors draw on sociology philosophy cultural studies and the sciences to round out the collection and highlight the breadth and vitality of modern architectural studies offering perspectives from different disciplines as well as different corners of the globe Architecture and Modernity Hilde Heynen, 2000-02-28 Bridges the gap between the history and theory of twentieth century architecture and cultural theories of modernity In this exploration of the relationship between modernity dwelling and architecture Hilde Heynen attempts to bridge the gap between the discourse of the modern movement and cultural theories of modernity On one hand she discusses architecture from the perspective of critical theory and on the other she modifies positions within critical theory by linking them with architecture She assesses architecture as a cultural field that structures daily life and that embodies major contradictions inherent in modernity arguing that architecture nonetheless has a certain capacity to adopt a critical stance vis vis modernity Besides presenting a theoretical discussion of the relation between architecture modernity and dwelling the book provides architectural students with an introduction to the discourse of critical theory The subchapters on Walter Benjamin Ernst Bloch Theodor Adorno and the Venice School Tafuri Dal Co Cacciari can be studied independently for this purpose **Architectural Theory** Bernd Evers, 2003 This book charts the fascinating history of architectural theory from the Renaissance to the present day Addressing its subject country by country and featuring over 850 illustrations it offers a chronological overview of the most important architects and architectural theoreticians from Alberti to Koolhaas Book jacket *New Book Design* Roger Fawcett-Tang, 2004-05-25 New Book Design showcases the most interesting influential and accomplished book designs from the last ten years It features over 100 titles published around the world each chosen for their outstanding design qualities from the publications of large mainstream publishers to those of small independent companies and even those from individual artists Included in its pages are lavishly produced books with unconventional formats and unusual print techniques as well as less flamboyant publications produced for various different markets A wide variety of books are featured from paperback novels to architectural monographs from text based to profusely illustrated books Divided into four main sections Packaging Navigation Layout and Specification the book examines each facet of book design cover design contents and structure image usage grids typography paper printing and binding Clear photography captures each featured book and interviews with prominent book designers art directors and

publishers provide extra insight New Book Design is sure to provide a rich source of inspiration to book designers and bibliophiles alike

**Graphic Horizons** Luis Hermida González, João Pedro Xavier, Inés Pernas Alonso, Carlos Losada Pérez, 2024-04-05 This book reports on several advances in architectural graphics with a special emphasis on education research and heritage It gathers a selection of contributions to the 20th International Congress of Architectural Graphic Expression EGA 2024 held on May 27-29, 2024 in Porto, Portugal with the motto Graphic Horizons This is the third volume of a 3 volume set

**Architecture and the Unconscious** John Shannon Hendrix, Lorens Eyan Holm, 2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams, desires, imagination, memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition

**Getting it Right with Type** Victoria Squire, Friedrich Forssman, Hans Peter Willberg, 2006 Typography is no longer the specialist domain of the typesetter these days anyone who uses a computer has access to a wide range of typefaces and effects This book offers an introduction to the basics of typography including choosing which typeface to use, adjusting letter line and word spacing for improved legibility, understanding kerning and leading and mastering typographic details such as italics, punctuation and line endings The book is illustrated throughout with practical examples demonstrating good and bad solutions There are tips for specific design tasks such as letters, charts, tables and design for the screen and a glossary explaining typographic terms

**The Threefold Logic of Advanced Architecture** Manuel Gausa, Jordi Vivaldi, 2021-04-15 During the last 30 years Advanced Architecture has consolidated an interactive and informational logic that differs from that of Modernity and Postmodernity This logic is threefold it is modulated through three coexisting protocols, modes of action whose peaks of intensity occur in three different decades: Conformative Protocols (1990-2000), Distributive Protocols (2000-2010) and Expansive Protocols (2010-2020) This work proposes a threefold cultural narrative whose interactive and informational logic differs from that of modernity and postmodernity It positions three different ethos by

critically approaching the architectural side of a cultural mutation that has been affecting the Western experimental areas of knowledge and practice since the end of the last century A transformative process constituted by a constellation of transdisciplinary manifestations accelerations turns shortcuts and clusterizations that by no means can be read under one single epistemological umbrella In this sense rather than approaching the practice of architecture focusing on its disciplinary inner specificity this book approaches the research of experimental architecture focusing on its extra disciplinary entanglements It argues that a vast multiplicity of fields of knowledge participates in a cultural endeavour modulated through three protocols forms of action that singularize three decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 These three periods shouldn't be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three overlapping and coexisting systems whose peaks of intensity occur in three different decades However the main purpose of this book is not limited to unveiling the ethos of these three conjugations It also aims at using this framework as a time field a narrative map that moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental architecture In this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse A tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates

**Architecture and Capitalism** Peggy Deamer, 2013-07-18 Architecture and Capitalism tells a story of the relationship between the economy and architectural design Eleven historians each discuss in brand new essays the time period they know best looking at cultural and economic issues which in light of current economic crises you will find have dealt with diverse but surprisingly familiar economic issues Told through case studies the narrative begins in the mid nineteenth century and ends with 2011 with introductions by Editor Peggy Deamer to pull the main themes together so that you can see how other architects in different times and in different countries have dealt with similar economic conditions By focussing on what previous architects experienced you have the opportunity to avoid repeating the past With new essays by Pier Vittorio Aureli Ellen Dunham Jones Keller Easterling Lauren Kogod Robert Hewison Joanna Merwood Salisbury Robin Schuldenfrei Deborah Gans Simon Sadler Nathan Rich and Micahel Sorkin *Cities on the Margin, on the Margin of Cities* Philippe Laplace, Eric Tabuteau, 2003

**Architecture's Pretexts** Aarati Kanekar, 2014-11-13 The aim of this book is to expose readers to architecture's pretexts that include literary narratives film theatre painting music and ritual as a bridge between diverse intellectual territories and architecture It introduces a selection of seminal modern and contemporary architectural projects their situation within the built environment and their intellectual and formal situation context as pretexts and design paradigms Connections between diverse bodies of information will be cultivated along with the ability to posit consequential relationships for the production

of architecture Architecture s Pretexts seeks to cultivate a vision for architecture that sponsors operative links between the discipline of architecture and those outside of architecture Exploring the works of various architects including Guiseppe Terragni Peter Eisenman Peter Zumthor Perry Kulper and Smout Allen and Rem Koolhaas this book provides the framework to understanding architecture through the lens of art Key concepts discussed are allegories diagrams form material montage movement musical ratios narrative sequence and representation A valuable tool with over 75 black and white illustrations for students and professionals interested in interdisciplinary methods of design thinking *Approaches to urbanism in Austria* Elise Feiersinger,Joost Meuwissen,Heidi Pretterhofer,2002 *Play Among Books* Miro Roman,Alice\_ch3n81,2021-12-06

How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice\_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science **Lost in Transition** Yiu-Wai Chu,2013-05-13 In this timely and insightful book Yiu Wai Chu takes stock of Hong Kong s culture since its transition to a Special Administrative Region of the People s Republic of China in 1997 Hong Kong had long functioned as the capitalist and democratic stepping stone to China for much of the world Its highly original popular culture was well known in Chinese communities and its renowned film industry enjoyed worldwide audiences and far reaching artistic influence Chu argues that Hong Kong s culture was lost in transition when it tried to affirm its international visibility and retain the status quo after 1997 In an era when China welcomed outsiders and became the world s most rapidly developing economy Hong Kong s special position as a capitalist outpost was no longer a privilege By drawing on various cultural discourses such as film popular music and politics of everyday life Chu provides an informative and critical analysis of the impact of China s ascendancy on the notion of One Country Two Cultures Hong Kong can no longer function as a bridge between China and the world writes Chu and must now define itself from global local and national perspectives

*Contested Legacies* Andrea Migotto,Martino Tattara,2023-12-15 In the light of the current housing and environmental crisis and increasing social inequalities there is a growing sense of urgency for architecture as a discipline to engage with the transformation in housing evident in the postwar period Rather than conceiving this task as a technical matter this book proposes to reassess the conditions and legacy of this large and ubiquitous housing stock By foregrounding the mismatch between constructed cultural social and ideological narratives and the everyday realities of residents the contributors rediscover some of the tropes of modern housing such as the impact of technological innovations or the often overlooked character of open spaces and unveil the intellectual and practical tools that paved the way for this large scale construction Contested Legacies advances a new notion of heritage which rather than seeking to preserve the past sets outs to actively

transform what exists to meet current societal needs It offers an atlas of exemplary cases each illustrating a defining yet often neglected aspect of modern postwar housing from which present engagement and active reflection can grow making the book an appealing read for both scholars and housing practitioners worldwide White City, Black City Sharon Rotbard, 2025-04-20 Gripping Economist A fascinating expos Raja Shehadeh author of Palestinian Walks Path breaking and brilliant Eyal Weizman director of Forensic Architecture and author of Hollow Land Tel Aviv the Zionist project s White City is said to have risen from the sands of the desert Acclaimed worldwide for its architectural heritage and gleaming Bauhaus inspired Modernism it is ostensibly designed to be a safe home for the Jewish people However the reality of the city s establishment was very different Hidden below its foundations are the remains of Jaffa the Black City a Palestinian city that was obliterated to make way for European style architecture at the heart of a newly formed Israel Both a gripping narrative and a unique architectural record White City Black City shows that cities are made not only of stones and concrete but also of stories and histories victors and losers predator and prey This new edition contains a postscript reflecting on the destruction of the Gaza Strip Sharon Rotbard is an Israeli architect publisher and author He co founded the independent press Babel Publishers and serves as Senior Lecturer in Architecture at the Bezalel Academy in Jerusalem He lives with his wife in Tel Aviv Designing for Health & Wellbeing: Home, City, Society Matthew Jones, Louis Rice, Fidel Meraz, 2019-12-03 Rapid urbanization represents major threats and challenges to personal and public health The World Health Organisation identifies the urban health threat as three fold infectious diseases non communicable diseases and violence and injury from amongst other things road traffic Within this tripartite structure of health issues in the built environment there are multiple individual issues affecting both the developed and the developing worlds and the global north and south Reflecting on a broad set of interrelated concerns about health and the design of the places we inhabit this book seeks to better understand the interconnectedness and potential solutions to the problems associated with health and the built environment Divided into three key themes home city and society each section presents a number of research chapters that explore global processes transformative praxis and emergent trends in architecture urban design and healthy city research Drawing together practicing architects academics scholars public health professional and activists from around the world to provide perspectives on design for health this book includes emerging research on healthy homes walkable cities design for ageing dementia and the built environment health equality and urban poverty community health services neighbourhood support and wellbeing urban sanitation and communicable disease the role of transport infrastructures and government policy and the cost implications of unhealthy cities etc To that end this book examines alternative and radical ways of practicing architecture and the re imagining of the profession of architecture through a lens of human health **Sayable Space. Narrative Practices in Architecture** Giovanni Corbellini, 2021-11-18 When a work reaches its maximum intensity wrote Le Corbusier a phenomenon of ineffable space occurs The ultimate quality of architecture would reside therefore in the

resistance to its description However to tell us this and much more the Swiss master has published more than seventy books and his so compelling formula in supporting the ineffable also shows how words are able to grasp it This brief essay investigates the multiple intersections between discourse and design the way buildings try to talk with their own specific means how architects are trying to remain relevant without building the paradoxes of architecture description after its completion the modes of communication during the project processes the capacity of narrative to act before the project operations start and infiltrate the collective perception making possible innovative approaches
