Zondor the Great John Greenridge, 2010 The events depicted in this book have all been adapted and embellished in order to create this science fiction novel spot the join if you can However most of the content espouses a more or less true record of time travels by the author The scientific theory embodied within the novel should give cosmic scientists a nudge in the right direction It offers a brand new hypothetical understanding of how the Universe actually operates John knows that as normal living and breathing human beings rather than the Mechanical Intelligent Memory Units MIM Units as described by Zondor you wont be tempted to believe this story That is until it happens to you the average sane human reader Yet recent scientific discoveries offer some credence to the tale Those new theories while similar to my experience depend on the idea of the projection of the Universe as a hologram and modern scientists owe some sympathy to the idea They have not had the dubious benefit of my experiences as a guide however So the idea of projecting serial electronic pictures across a time continuum and onto an event horizon has not hit the new science headlines so far even though the technology exists for such events Like all new science my idea will have its arm chair critics The reader of this book is about to become one of those critics To the sceptic I would ask the question How long is it since radio and television were invented discovered If you wrote a book about radio and television in the 19th Century would you have ended up in the loony bin Most likely John Greenridge 2009

 capable of both emotion and reasoning Brenda lives with the professor's family and Steve lives with the professor's chief
 assistant When the Professor announces his creation at a technical conference he is sharply criticized Many wonder how the
 androids will fit into society Will they have rights And how can they be controlled considering that theoretically they will

 returns to be put to sleep to spare her family punishment Steve finds a home where he passes himself off as a normal
 humanoid servant As the months pass Steve decides to survive on his own and starts creating conscious androids like himself
 When Professor Cupar discovers Steve's activities he knows that serious repercussions will result if anyone finds out that
 these humanoids have started to multiply on their own Now he wants to find Steve and disable the other conscious
 humanoids before they integrate with society But Steve has learned a thing or two while on his own and he's not about to let
 a human rob him of his chance to control his own destiny Digital Ego Jacob van Kokswijk, 2007 **EATES SOP** John

Do Ask, Do Tell Bill Boushka, 2000 The original Bill of Rights sponsored largely by James Madison is now about 210 years old Reinforced by the Fourteenth Amendment which eventually applied many of its provisions to the states it has served us well It is time to re evaluate our fundamental constitutional rights and to seriously consider their major renovation This is my central proposal Are we ready to trust ourselves as individuals with the personal responsibilities that go with rights When government defines personal moral values we tend to take less account for not only our own actions but also our own underlying values for those spiritual yearnings that make us all unique people who we are We tend to lose interest in speaking for ourselves and tend to leave moral judgments to experts who get paid to pass judgment on all of us I discuss a philosophy often called libertarianism of extremely restricted government I present it from the personal perspective of a gay man who grew up in a period of enormous change and migration toward cultural individualism My argument is intended for everyone but I provide my own detailed perspectives on many issues The parallel between draft deferments during the Vietnam era and the gays in the military battle today How close the gay community as we know it came to total catastrophe during the early days of AIDS crisis What the family values debate is really all about Volunteerism and social obligations and how both military service and parenting fit into these What discrimination is really all about How the Don't Tell mentality interferes with political and social debate in many areas Why equal rights for gays is important for everybody A science of personal growth and why libertarianism is good for personal growth
