Usfs National Situation Fire Report:

Reports and Documents United States. Congress, 1967 *A Review of the Forest Service Remote Automated Weather Station (RAWS) Network* John Zachariassen, 2003 The RAWS network and RAWS data use systems are closely reviewed and summarized in this report RAWS is an active program created by the many land management agencies that share a common need for accurate and timely weather data from remote locations for vital operational and program decisions specific to wildland and prescribed fires A RAWS measures basic observable weather parameters such as temperature relative humidity wind speed wind direction and precipitation as well as fuel stick temperature Data from almost 1 900 stations deployed across the conterminous United States Alaska and Hawaii are now routinely used to calculate and forecast daily fire danger indices components and adjective ratings Fire business applications include the National Fire Danger Rating System NFDRS fire behavior and fire use Findings point to the fact that although the RAWS program works and provides needed weather data in support of fire operations there are inefficiencies and significant problem areas that require leadership attention at the National level *U.S. Forest Service Research Paper RM*. Rocky Mountain Forest and Range Experiment Station (Fort Collins, Colo.), 1973 **Examination of Firefighting Policy with U.S. Forest Service and U.S. Department of the Interior** United States. Congress. Senate. Committee on Appropriations. Subcommittee on Department of the Interior, Environment, and Related Agencies, 2011 **General Technical Report RMRS** , 2006 Between Two Fires Stephen J. Pyne, 2015-10-15 From a fire policy of prevention at all costs to today's restored burning Between Two Fires is America's history channeled through the story of wildland fire management Stephen J Pyne tells of a fire revolution that began in the 1960s as a reaction to simple suppression and single agency hegemony and then matured into more enlightened programs of fire management It describes the counterrevolution of the 1980s that stalled the movement the revival of reform after 1994 and the fire scene that has evolved since then Pyne is uniquely qualified to tell America's fire story The author of more than a score of books he has told fire's history in the United States Australia Canada Europe and the Earth overall In his earlier life he spent fifteen seasons with the North Rim Longshots at Grand Canyon National Park In Between Two Fires Pyne recounts how after the Great Fires of 1910 a policy of fire suppression spread from America's founding corps of foresters into a national policy that manifested itself as a costly all out war on fire After fifty years of attempted fire suppression a revolution in thinking led to a more pluralistic strategy for fire's restoration The revolution succeeded in displacing suppression as a sole strategy but it has failed to fully integrate fire and land management and has fallen short of its goals Today the nation's backcountry and increasingly its exurban fringe are threatened by larger and more damaging burns fire agencies are scrambling for funds firefighters continue to die and the country seems unable to come to grips with the fundamentals behind a rising tide of megafires Pyne has once again constructed a history of record that will shape our next century of fire management Between Two Fires is a story of ideas institutions and fires It's America's story told through the nation's flames

On the Fireline Matthew Desmond,2008-11-15 In this rugged account of a rugged profession Matthew Desmond explores the heart and soul of the wildland firefighter Having joined a firecrew in Northern Arizona as a young man Desmond relates his experiences with intimate knowledge and native ease adroitly balancing emotion with analysis and action with insight *On the Fireline* shows that these firefighters aren't the adrenaline junkies or romantic heroes as they're so often portrayed An immersion into a dangerous world *On the Fireline* is also a sophisticated analysis of a high risk profession and a captivating read Gripping a masterful account of how young men are able to face down wildfire and why they volunteer for such an enterprise in the first place David Grazian Sociological Forum Along with the risks and sorrow Desmond also presents the humor and camaraderie of ordinary men performing extraordinary tasks A good complement to Norman Maclean's *Young Men and Fire* Recommended Library Journal Proposed Abengoa Biorefinery Project Near Hugoton, Stevens County ,2010
