Students will be able to progress through the book attempting each exercise in a logical sequence, beginning with basic principles and working up to more complex exercises. Alternatively, they may wish to focus on specific chapters on specialist areas, e.g. population dynamics. Many of the exercises introduce students to mathematical methods, calculations, use of formulae, drawing of graphs, calculating simple statistics. Other exercises simulate fieldwork projects, allowing users to collect and analyze data which would take considerable time and effort to collect in the field.
