The Archaeology of Southern Africa Peter Mitchell, 2024-06-06 Some of humanity's earliest ancestors lived in southern Africa and evidence from sites there has inspired key debates on human origins and the emergence of complex cognition Building on its rich rock art heritage archaeologists have developed theoretical work that continues to influence rock art studies worldwide with the relationship between archaeological and anthropological data central to understanding past hunter gatherer pastoralist and farmer communities alike New work on pre colonial states contests models that previously explained their emergence via external trade while the transformations wrought by European colonialism are being rewritten to emphasise Indigenous agency feeding into efforts to decolonise the discipline itself Inhabited by humans longer than almost anywhere else and with an unusually varied complex past southern Africa thus has much to contribute to archaeology worldwide In this revised and updated edition Peter Mitchell provides a comprehensive and extensively illustrated synthesis of its archaeology over more than three million years

Implementing Environmental Constitutionalism Erin Daly, James R. May, 2018-11-08 Constitutions can play a central role in responding to environmental challenges such as pollution biodiversity loss lack of drinking water and climate change The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights Such environmental constitutionalism however falls short without effective implementation by policymakers advocates and jurists *Implementing Environmental Constitutionalism* Current Global Challenges explains and explores this implementation gap This collection is both broad and deep While some of the essays analyze crosscutting themes such as climate change and the need for rule of law that affect the implementation of environmental constitutionalism throughout the world others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively implemented This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment

Global-Regional Linkages in the Earth System Peter D. Tyson, Roland Fuchs, Congbin Fu, Louis Lebel, Hermine Vloemans, Eric Odada, John Perry, Will Steffen, Hassan Virji, 2002-04-30 Global environmental change

occupies a central niche in the pantheon of modern sciences There is an urgent need to know and understand the way in which global biogeochemical cycles have changed over different time scales in the past and are likely to do so in the future Equally important it is necessary to determine the extent to which natural variability and that induced by anthropogenic activities are bringing about change A number of international co-operative scientific programmes address these issues Chief among them are the International Geosphere Biosphere Programme IGBP the World Climate Research Programme WCRP and the International Human Dimensions Programme IHDP for global change This book is one of a series of IGBP syntheses drawing together findings in global environmental change over the past decade or so One focus of IGBP activities is the System for Analysis Research and Training START Co-sponsored by the WCRP and IHDP START establishes regional research networks for global change science in developing countries stimulates and carries out global change research in developing regions of the world and builds capacity to undertake such research at personal institutional and regional levels Several regional global change networks have been established and much regional research has been accomplished in the last five years or so In this book work relating to four of the older START regions Southern Africa South Asia Southeast Asia and East Asia will be used as case studies to illustrate regional global linkages in Earth System Science

Democracy's Infrastructure Antina von Schnitzler, 2016-11-08 In the past decade South Africa's miracle transition has been interrupted by waves of protests in relation to basic services such as water and electricity Less visibly the post-apartheid period has witnessed widespread illicit acts involving infrastructure including the nonpayment of service charges the bypassing of metering devices and illegal connections to services *Democracy's Infrastructure* shows how such administrative links to the state became a central political terrain during the anti-apartheid struggle and how this terrain persists in the post-apartheid present Focusing on conflicts surrounding prepaid water meters Antina von Schnitzler examines the techno-political forms through which democracy takes shape Von Schnitzler explores a controversial project to install prepaid water meters in Soweto one of many efforts to curb the nonpayment of service charges that began during the anti-apartheid struggle and she traces how infrastructure payment and technical procedures become sites where citizenship is mediated and contested She follows engineers utility officials and local bureaucrats as they consider ways to prompt Sowetans to pay for water and she shows how local residents and activists wrestle with the constraints imposed by meters This investigation of democracy from the perspective of infrastructure reframes the conventional story of South Africa's transition foregrounding the less visible remainders of apartheid and challenging readers to think in more material terms about citizenship and activism in the postcolonial world *Democracy's Infrastructure* examines how seemingly mundane technological domains become charged territory for struggles over South Africa's political transformation

Naturalizing Inequality Michela Marcatelli, 2021-10-05 The book discusses the reproduction and legitimization of racial inequality in post-apartheid South Africa Michela Marcatelli unravels this inequality paradox through an ethnography of water in a rural region of the country

She documents how calls to save nature have only deepened and naturalized inequality **Official Gazette of the United States Patent Office** United States. truth about water varies depending on the individual's perspective, their purpose and their individual interests. Further, how one defines water quality influences what treatment processes are preferred in order to improve water quality. The book explains why, for example, a treatment process meant to improve water quality gained a bad reputation by the public because of the South African government's silo approach. The book explains how these social constructions are entrenched in power relations between stakeholders regarding AMD treatment and illustrates how power was used to influence decisions to improve the water quality of the Blesbokspruit. The case presented in this book offers insights and recommendations for policymakers working in water governance, including means to influence social constructions of water quality and ways to clarify roles and responsibilities in pursuit of improved cooperative government.

Water and Climate Change Trevor Letcher, 2022-07-03. *Water and Climate Change: Sustainable Development, Politics and Social Issues* focuses on climate change and global warming, sustainable development and social and political issues surrounding water. Throughout the book, global contributors provide an outlook on the possible future of the world if climate issues continue to increase. In this regard, readers will become fully aware of the dangers of climate change and global warming. To counterbalance, the book also provides an outlook to the possible future of the world if changes are made and emissions are reduced. Water shortages and water pollution are real and are beginning to affect the lives of every one of us on the planet. We are rapidly reaching a point of no return. If we do nothing about water shortages and water pollution, many of the catastrophes mentioned in this book will come to pass. As such, this reference is a must-read resource for environmental scientists and engineers, water resource experts, agriculturalists, social scientists, earth scientists, geographers and decision makers in government and water management. Covers a wide spectrum of topics related to water usage as discussed by world authorities; all experts in their own field. Includes references and further reading at the end of each chapter, giving the reader all the very latest thinking and information on each topic. Provides case studies that follow a consistent template, presenting the reader with easy-to-find real-life examples.

Patriots & Parasites Dene Smuts, 2016-11-01. *Patriots* The great experiment in catharsis that was the Truth and Reconciliation Commission. The reinvigoration of racial polarisation under the Mbeki administration and the slow burn of resentment that is coming to a head among the next generation as manifested in the Rhodes Must Fall campaign. The entrenchment of cronyism under Zuma and the fight to protect the crucial balance of accountability enshrined in the freedom of the media and the independence of the judiciary.

South Africa's Water Predicament Anja du Plessis, 2023-01-13. The book provides a critical evaluation of South Africa's freshwater resources to illustrate the way in which its freshwater resources, water access services and infrastructure have continued to decline over the past three decades. The continued decline of water governance, management, water service delivery, dilapidated water infrastructure, dysfunctional local governments and overall excessive water degradation is illustrated and emphasized using real-life examples and case studies from various contexts within the country. The main argument of the book is that South Africa's freshwater resources have

declined to such an extent that it can be described as a predicament Questionable water governance decisions and reactive water management practices have led to no improvement and or increased degradation of freshwater resources An overall lack of service delivery exists across the country in various contexts leading to further water and social decline An interdisciplinary evaluation of South Africa s current water predicament is provided major water crises are prioritized and suitable recommendations are given to transform its predicament into problems which can be addressed Suitable background information is given to emphasize the necessity of good water governance management and service delivery South Africa s freshwater resources are evaluated with specific focus on the decline of informed water governance management service delivery and water quality Factors requiring urgent attention are determined and suitable recommendations and or actions are provided An evaluation and overall synthesis focused on the transformation of the predicament into problems is provided Primary water problems are prioritized according to urgency and suitable recommendations are given to assist in transforming the country s current complex water predicament into simpler water problems Political will collaboration with researchers stakeholders non governmental organizations and cooperation of civil society is required South Africa s already scarce freshwater resources and decaying infrastructure will persist and possibly collapse if no major actions or interventions are implemented
