**Additive Manufacturing: Materials, Processes, Quantifications and Applications** Jing Zhang, Yeon-Gil Jung, 2018-05-17. Additive Manufacturing: Materials, Processes, Quantifications and Applications is designed to explain the engineering aspects and physical principles of available AM technologies and their most relevant applications. It begins with a review of the recent developments in this technology and then progresses to a discussion of the criteria needed to successfully select an AM technology for the embodiment of a particular design, discussing material compatibility, interfaces, issues, and strength requirements. The book concludes with a review of the applications in various industries, including bio, energy, aerospace, and electronics. This book will be a must read for those interested in a practical, comprehensive introduction to additive manufacturing, an area with tremendous potential for producing high-value, complex, individually customized parts. As 3D printing technology advances both in hardware and software, together with reduced materials cost and complexity of creating 3D printed items, these applications are quickly expanding into the mass market. Includes a discussion of the historical development and physical principles of current AM technologies. Exposes readers to the engineering principles for evaluating and quantifying AM technologies. Explores the uses of Additive Manufacturing in various industries, most notably aerospace, medical, energy, and electronics.

**Advances in Best-Worst Method** Jafar Rezaei, Matteo Brunelli, Majid Mohammadi, 2021-11-10. This book presents recent advances in the theory and application of the Best Worst Method (BWM). It includes selected papers from the Second International Workshop on Best Worst Method (BWM2021) held in Delft, The Netherlands, from 10-11 June 2021, and provides valuable insights on why and how to use BWM in a diverse range of applications, including health, energy, supply chain management, and engineering. The book highlights the use of BWM in different settings, including single decision making vs. group decision making, and complete information vs. incomplete and uncertain situations. The papers gathered here will benefit academics and practitioners who are involved in multi-criteria decision making and decision analysis.
