

## Maintenance Valmet 6000—8750

N.B. Detailed maintenance instructions, see Operator's Manual.

### General

Correct maintenance at the right time is a basic condition for reliable operation of the tractor. Maintenance costs are small compared with any repair costs resulting from lack of maintenance. The most important measures are those which you carry out yourself and which include lubrication and various checks and adjustments.

The service intervals shown apply for normal operating conditions but in more severe conditions servicing should be carried out more frequently.

### General instructions concerning oil checks and oil filling

- Always stop the engine before starting work.
- Apply the parking brake to ensure the tractor cannot move. If the ground is uneven the wheels should be switched.
- Wash down the tractor first so that the work can be done more easily and quickly.
- Always observe the utmost cleanliness in all maintenance work. Thoroughly wipe off dirt caps and plugs as well as surrounding parts of the tractor before filling up with fuel or oil.
- Inspect the oil and filters when changing. Large amounts of dirt (e.g. heavily clogged filters) can point to a fault which could cause extensive and costly repairs if not corrected in time.
- When carrying out checks the tractor should stand on level ground.
- Levels should be checked in the morning when the oil is cold and has had time to run down to the bottom of the unit concerned.
- When changing the oil, bear in mind that the oil can be very hot when it drains from the tractor. Waste oil and oil filters should be handled carefully and disposed of properly.
- After completion of the service work always replace all safety covers etc.

### Greasing lubricating points fitted with grease nipples

- Always clean the grease nipples before applying the grease gun.
- Apply grease through the nipples until clean grease issues out (unless otherwise instructed).
- Wipe away superfluous grease which has been pressed out at the lubricating point.
- Preferably carry out lubrication with bearing points and joints unloaded and with the bearings in different positions.

### Lubrication and maintenance schedule

All intervals are counted from zero hours on the hour recorder. For example, 1000-hour service is carried out every 1000 (exactly), 2000 hours (every other year) etc. even if the guaranteed service has been carried out.

**Example:** The 1000-hour service contains all items mentioned under 10 h/Daily, 50 h/once a week, 250 h, 500 h and 1000 h.
