Using Food As Math Lessons:

Literature-based Math Activities Alison Abrohms, 1992 This unique resource uses 40 popular children's books as springboards to math learning. It's brimming with activities and reproducibles that focus on number sense, operations, fractions, patterns, measurement, money, time, probability, and much more.

Object Lessons Caren Holtzman, Lynn Susholtz, 2024-11-15 When Caren Holtzman and Lynn Susholtz look around a classroom, they see a veritable goldmine of mathematical investigations involving number, measurement, size, shape, symmetry, ratio, and proportion. They also think of the ways great artists have employed these concepts in their depictions of objects and space, for example, Picasso's use of geometric shapes in his Cubist still lifes or contemporary artist Tara Donovan's room-sized sculptures of everyday items. In their new book *Object Lessons*, Caren, a math educator, and Lynn, an artist and art educator, use a highly visual approach to show students and teachers the art in math and the math in art. Integrating visual arts into math experiences makes the lessons accessible, engaging, and meaningful for a wide range of students. In each chapter, the authors use everyday objects to create rigorous hands-on activities that address key mathematics standards and concepts. Each lesson provides an introduction to the featured object that explains how it connects to key mathematical concepts, a discussion of the artist's art styles and techniques, featured activities organized by grade level and math content area, the basic materials required to prepare and teach each lesson, a clear picture of what the lesson will look like in a classroom, and a list of resources. The book and its accompanying CD feature a wonderful gallery of images including art photos and student work, and a collection of links to art education organizations, museums, and Web sites that focus on the work of forty major artists.

Math, Manipulatives, & Magic Wands Karen Simmons, Cindy Guinn, 2001 This book shows you how to teach national math standards with literature-based make-and-take projects. Suggestions for illustrating math concepts with children's literature are included for each activity.

Math Snacks: Problem-Solving Fun with Food Manipulatives Eliza Anne Sorte, 1999 The methods used in this book help children make sense of mathematical concepts by allowing them to manipulate food items in order to solve problems.
