Behavioural Adaptation and Road Safety Christina Rudin-Brown,Samantha Jamson,2013-05-24 Despite being an accepted construct in traffic and transport psychology the precise nature of behavioural adaptation including its causes and consequences has not yet been established within the road safety community A comprehensive collection of recent literature *Behavioural Adaptation and Road Safety Theory Evidence and Action* explores behavioural adaptation in road users It examines behavioural adaptation within the context of historical and theoretical perspectives and puts forth tangible and

practical solutions that can effectively address adverse behavioural adaptation to road safety interventions before it occurs Edited by Christina Rudin Brown and Samantha Jamson with chapters authored by leading road safety experts in driver psychology and behaviour the book introduces the concept of behavioural adaptation and details its more relevant issues It reviews the definition of behavioural adaptation that was put forward by the OECD in 1990 and then puts this definition through its paces identifying where it may be lacking and how it might be improved This sets the context for the remaining chapters which take the OECD definition as their starting points The book discusses the various theories and models of behavioural adaptation and more general theories of driver behaviour developed during the last half century It provides examples of the evidence for behavioural adaptation instances in which behavioural adaptation arose as a consequence of the introduction of safety countermeasures The book then focuses on the internal human element and considers countermeasures that might be used to limit the development of behavioural adaptation in various road user groups The book concludes with practical tools and methodologies to address behavioural adaptation in research and design and to limit the potential negative effects before they happen Supplying easy to understand accessible solutions that can be implemented early on in a road safety intervention s design or conception phase the chapters represent the most extensive compilation of literature relating to behavioural adaptation and its consequences since the 1990 OECD report The book brings together earlier theories of behavioural adaptation with more recent theories in the area and combines them with practical advice methods and tangible solutions that can minimise the potential negative impact of behavioural adaptation on road user safety and address it before it occurs It is an essential component of any road safety library and should be of particular relevance to researchers practitioners designers and policymakers who are interested in maximizing safety while at the same time encouraging innovation and excellence in road transport related design

Understanding the Decision-making Process for Drivers Faced with Lane Restriction Or Closures on Wisconsin Highways Laura Higgins,2013

The Wisconsin Department of Transportation WisDOT owns and operates a state highway network of 12 000 miles which carries approximately 80 percent of vehicle miles traveled in the state Construction maintenance weather and other events often lead to lane closures or restrictions causing inconvenience to road users WisDOT developed numerous strategies for identifying alternate routes that drivers can use when highway travel times are affected by planned or unplanned events Despite these efforts WisDOT has observed that many alternate routes are underused even when those routes would save travelers significant travel time The objective of this project was to examine the decision making processes of Wisconsin drivers regarding route selection including their decisions to use or not use an alternate route instead of the highway network Factors that were examined included how and when drivers make initial decisions about a preferred route for both familiar and unfamiliar trips the factors that influence their decisions to divert or not divert from their usual or current route to an alternate route and the information sources they would most likely consult for travel and route information
