**The History of Geophysics in Southern Africa** Johan H de Beer,2016-01-25 Geophysics is a comparatively young science which only evolved as a distinct discipline during the 19th century However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488 This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country s proud history The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa      The Anglo-African Who's who and Biographical Sketch-book Walter H. Wills,R. J. Barrett,1884      **Joernaal Vir Eietydse Geskiedenis** ,2003      **The History of Mining** Michael Coulson,2012-11-12 THE INDUSTRY THAT FORGED THE MODERN WORLD Throughout history metals and raw materials have underpinned human activity So it is that the industry responsible for extracting these materials from the ground mining has been ever present throughout the history of civilisation from the ancient world of the Egyptians and Romans to the industrial revolution and the British Empire and through to the present day with mining firms well represented on the world s most important stock indexes including the FTSE100 This book traces the history of mining from those early moments when man first started using tools to the present day where metals continue to underpin economic activity in the post industrial age In doing so the history of mining methods important events technological developments the important firms and the sparkling personalities that built the industry are examined in detail At every stage as the history of mining is traced from 40 000BC to the present day the level of detail increases in accordance with the greater social and industrial developments that have played out as time has progressed This means that a particular focus is given to the period since the industrial revolution and especially the 20th century A look is also taken into the future in an effort to chart the direction this great industry might take in years to come Many books have been written about mining the majority have focused on a particular metal geographical area mining event or mining personality but The History of Mining has a broader scope and covers all of these essential and fascinating areas in one definitive volume      **Anglo-African Who's Who , Mining Journal, Railway & Commercial Gazette** ,1888      *The Mining Journal, Railway and Commercial Gazette* ,1891      **The South African Mining and Engineering Journal** ,1921      South Africa ,1912      **Picturing Change** Brenda Schmahmann,2013-04-01 An in depth look at the evolving ethos of curating and collecting art at South African

universities In *Picturing Change* Brenda Schmahmann explores the implications of deploying the visual domain in the service of transformative agendas and unpacks the complexities contradictions and slippages involved in this process She shows that although most new commissions have been innovative some universities have acquired works with potentially traditionalist even backward looking implications While the motives behind removing inherited imagery may be underpinned by a desire to unsettle white privilege in some cases such actions can also serve to maintain the status quo This book is unique in exploring the transformative ethos evident in the curation of visual culture at South African universities It will be invaluable to readers interested in public art the politics of curating and collecting as well as to those involved in transforming tertiary and other public institutions into spaces that welcome diversity Since South Africa's transition to democracy many universities have acquired new works of art that convey messages about the advantages of cultural diversity and engage critically with histories of racial intolerance and conflict Given concerns about the influence of British imperialism or Afrikaner nationalism on aspects of their inherited visual culture most tertiary institutions are also seeking new ways to manage their existing art collections and to introduce memorials insignia or regalia which reflect the universities newfound values and aspirations
