**Review of the state of the world fishery resources: Inland fisheries** Food and Agriculture Organization of the United Nations, 2018-11-05 The FAO Fishery and Aquaculture Circular C942 Revision 3 C942 Rev 3 updates and expands the scope of previous revisions of the

circular C942 Rev 3 is an important baseline document intended to assist in the global understanding of inland fisheries and inform dialogue on their current and future role. The third revision reviews the status and trends of inland fisheries catch at global, continental and subcontinental levels. It places inland capture fisheries in the context of overall global fish production and calls attention to the importance of inland capture fisheries with respect to food security and nutrition and the Sustainable Development Goals. It quantifies global inland fisheries resources in terms of food production, nutrition, employment, economic contribution with respect to those countries, regions or subnational areas where they are important. A characterization approach to distinguish large scale and small scale fishing operations and their relative contributions is provided. The review provides estimated economic values of inland fisheries as well as a valuation of potential replacement cost of these in terms of dollars, other resources such as land and water, feeds. There is also an analysis of the extent and economic value of recreational inland fisheries. The contribution to employment and the gender differences related to this are quantified. The linkages between inland fisheries and biodiversity are also explored. C942 Rev 3 discusses ways to measure and assess inland fisheries in particular how to establish more accurately inland fishery catches in the many situations where there are challenges to collection of catch statistics.

**Implementing Environmental Constitutionalism** Erin Daly, James R. May, 2018-11-08. Constitutions can play a central role in responding to environmental challenges such as pollution, biodiversity loss, lack of drinking water and climate change. The vast majority of people on earth live under constitutional systems that protect the environment or recognize environmental rights. Such environmental constitutionalism, however, falls short without effective implementation by policymakers, advocates and jurists. *Implementing Environmental Constitutionalism: Current Global Challenges* explains and explores this implementation gap. This collection is both broad and deep. While some of the essays analyze crosscutting themes such as climate change and the need for rule of law that affect the implementation of environmental constitutionalism throughout the world, others delve deeply into geographically contextual experiences for lessons about how constitutional environmental law might be more effectively

implemented This volume informs global conversations about whether and how environmental constitutionalism can be made more effective to protect the natural environment

Corrupted Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
