Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and

often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration

Critical Perspectives on Work-Integrated Learning in Higher Education Institutions Nirmala Dorasamy, Renitha Rampersad, 2018-11-30

Governments around the world are committed to enhancing students' graduation. Work integrated learning (WIL) is one of the many programmes which Higher Education Institutions (HEIs) can develop to promote this facet of student life. The incorporation of work integrated learning in curriculum design and development can produce reciprocal benefits for students, workplaces, professions and communities. Any curriculum design and development endeavour relating to WIL requires appropriate resources to support curriculum development. This book serves to explore WIL programmes and experiences for the student, WIL coordinator and supervisor. It further integrates practical, relevant and reflective industry experience within the higher education curriculum to enhance student development. WIL has no uniform or specific framework or approaches since it is an emerging field and is generally influenced by contextual factors. In view of the diversity in theory and practice and different purposes, whether pragmatic or practical, driving the adoption of one approach over another, this book highlights the diverse approaches that encapsulate WIL in South Africa. Serving Higher Purposes Ihron Rensburg, 2020-11-05
