and vision system can reduce an adult s risk of chronic health conditions death falls and injuries social isolation depression
and other psychological problems In children properly maintained eye and vision health contributes to a child s social
development academic achievement and better health across the lifespan The public generally recognizes its reliance on
sight and fears its loss but emphasis on eye and vision health in general has not been integrated into daily life to the same
extent as other health promotion activities such as teeth brushing hand washing physical and mental exercise and various
injury prevention behaviors A larger population health approach is needed to engage a wide range of stakeholders in
coordinated efforts that can sustain the scope of behavior change The shaping of socioeconomic environments can eventually
lead to new social norms that promote eye and vision health Making Eye Health a Population Health Imperative Vision for
