Best Practices Are Stupid Stephen M. Shapiro, 2011-09-29 What if almost everything you know about creating a culture of innovation is wrong What if the way you are measuring innovation is choking it What if your market research is asking all of the wrong questions It s time to innovate the way you innovate Stephen Shapiro is one of America s foremost innovation advisers whose methods have helped organizations like Staples GE Telef nica NASA the U S Air Force and USAA He teaches his clients that innovation isn t just about generating occasional new ideas it s about staying consistently one step ahead of the competition Hire people you don t like Bring in the right mix of people to unleash your team s full potential Asking for ideas is a bad idea Define challenges more clearly If you ask better questions you will get better answers Don t think outside the box find a better box Instead of giving your employees a blank slate provide them with well defined parameters that will increase their creative output Failure is always an option Looking at innovation as a series of experiments allows you to redefine failure and learn from your results Shapiro shows that nonstop innovation is attainable and vital to building a high performing team improving the bottom line and staying ahead of the pack *The Best Interface Is No Interface* Golden Krishna, 2015-01-31 Our love affair with the digital interface is out of control We ve embraced it in the boardroom the

bedroom and the bathroom Screens have taken over our lives Most people spend over eight hours a day staring at a screen and some technological innovators are hoping to grab even more of your eyeball time You have screens in your pocket in your car on your appliances and maybe even on your face Average smartphone users check their phones 150 times a day responding to the addictive buzz of Facebook or emails or Twitter Are you sick There s an app for that Need to pray There s an app for that Dead Well there s an app for that too And most apps are intentionally addictive distractions that end up taking our attention away from things like family friends sleep and oncoming traffic There s a better way In this book innovator Golden Krishna challenges our world of nagging screen based bondage and shows how we can build a technologically advanced world without digital interfaces In his insightful raw and often hilarious criticism Golden reveals fascinating ways to think beyond screens using three principles that lead to more meaningful innovation Whether you re working in technology or just wary of a gadget filled future you ll be enlightened and entertained while discovering that the best interface is no interface
