Symposium ,2009 **Critical Race Spatial Analysis** Deb Morrison,Subini Ancy Annamma,Darrell D. Jackson,2023-07-03 How does space illuminate educational inequity Where and how can spatial analysis be used to disrupt educational inequity Which tools are most appropriate for the spatial analysis of educational equity This book addresses these questions and explores the use of critical spatial analysis to uncover the dimensions of entrenched and systemic racial inequities in educational settings and identify ways to redress them The contributors to this book some of whom are pioneering scholars of critical race spatial analysis theory and methodology demonstrate the application of the

theory and tools applied to specific locales and in doing so illustrate how this spatial and temporal lens enriches traditional approaches to research. The opening macro theoretical chapter lays the foundation for the book, rooting spatial analyses in critical commitments to studying injustice. Among the innovative methodological chapters included in this book is the reconceptualization of mapping and space beyond the simple exploration of external spaces to considering internal geographies, highlighting how the privileged may differ in socio-spatial thinking from oppressed communities and what may be learned from both perspectives. Data representations that allow the construction of varied narratives based on differences in positionality and historicity of perspectives, the application of redlining to the analysis of classroom interactions, the use of historical archives to uncover the process of marginalization, and the application of techniques such as the fotonovela and GIS to identify how spaces are defined and can be reimagined. The book demonstrates the analytical and communicative power of mapping and its potential for identifying and dismantling racial injustice in education. The editors conclude by drawing connections across sections and elucidating the tensions and possibilities for future research.

QuantCrit Nichole M. Garcia, Nancy López, Verónica N. Vélez, 2023-05-29. Critical race theory (CRT) in education centers examines and seeks to transform the relationship that undergirds race, racism, and power. CRT scholars have applied a critical race framework to advance research methodologies in the form of qualitative interventions. Informed by this work, this book reconsiders the possibilities of CRT applications to quantitative methodologies through QuantCrit. This volume posits the question: How can quantitative methods long critiqued for their inability to capture the nuance of everyday experience support and further a critical race agenda in educational research? It provides a starting point for how QuantCrit principles are employed by interdisciplinary contributions in race and quantitative studies. The contributors to the book examine the legacy and genealogy of QuantCrit traditions across disciplines to uncover a rich lineage of methodological possibilities for disrupting racism in research. They argue that quantitative approaches cannot be adopted for racial justice aims without an ontological reckoning that considers historical, social, political, and economic power relations. Only then can a quantitative approach be reimagined and rectified. This book will be of interest to researchers and advanced students of Education, Sociology, Social Work, Politics, and Racial and Ethnic Studies. It was originally published as a special issue of the

journal Race Ethnicity and Education **Antiracist Library and Information Science** Kimberly Black, Bharat Mehra, 2023-03-21 Critical scholarly and reflective perspectives on the theory practice and progress made towards achieving antiracism in the various domains of Library and Information Science and towards creating racial justice in communities through the work of information professionals
