*The Boy Who Did Not Sign* Ashish Ranjan, 2023-08-31. Ashwin Taksh is a 23-year-old small-town boy who aspires to work as a scientist at the Indian Space Research Organisation (ISRO) India's Space Program, which accepts only 0.04% of applicants. In June 2017, he is coming out of a failure in his first attempt to qualify for the highly competitive ISRO entrance exam. When he gets admitted to India's prestigious Nuclear Program, instead, he accepts even though it's not his first choice. He initiates his new job and decides to simultaneously study for the next ISRO exam, quickly learning that this is no ordinary job either. It requires him to complete a one-year stringent training program in Nuclear Science Engineering at its Academy, learning the most complex and cutting-edge technologies of Nuclear Fission. The further he moves, the more he understands the price of achieving a dream career. When he begins to develop feelings for one of his colleagues, he discovers the politics and groupism of the Academy. He finds himself cornered by the corruption of the system. Ashwin must decide whether he is willing to risk his sanity and achievements, risking his high-end career in the Nuclear program for the illustrious career he has always dreamed of. This path he chose led him to make choices that pushed his career to the verge of termination. What actions and determination brought an academically poor boy into the Nuclear Program of the World's Largest Democracy? What concoction of passion, stubbornness, and ego then brought him to the verge of unemployment? A Rogue Scientist. The Boy Who
