**Moto** ,2001      **Occasional Papers** ,1993      **Education and Development in Zimbabwe** Edward Shizha,Michael T. Kariwo,2012-01-01 The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe It challenges scholars to think about the role of education its funding and the egalitarian approach to widening access to education The nexus between education democracy and policy change is a complex one The book provides an illuminating account of the constantly evolving notions of national identity language and citizenship from the Zimbabwean experience The book discusses educational successes and challenges by examining the ideological effects of social political and economic considerations on Zimbabwe s colonial and postcolonial education Currently literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe This book is likely to be one of the first on the impact of social political and economic meltdown on education The book is targeted at local and international academics and scholars of history of education and comparative education scholars of international education and development undergraduate and graduate students and professors who are interested in educational development in Africa particularly Zimbabwe Notwithstanding the book is a valuable resource to policy makers educational administrators and researchers and the wider community Shizha and Kariwo s book is an important and illuminating addition on the effects of social political and economic trajectories on education and development in Zimbabwe It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture The book offers new insights that may be useful for an understanding of not only the Zimbabwean case but also education in other African countries Rosemary Gordon Senior Lecturer in Educational Foundations University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist universal elementary education to the disarray of contemporary socioeconomic crisis covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching this text provides a comprehensive wide ranging and yet carefully detailed account of education in Zimbabwe This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe s education specifically but more widely to all who are interested in how the sociopolitical shapes education how ideology policy international pressures economic factors and shifts in values collectively forge the historical and contemporary character of a country s education Handel Kashope Wright Professor of Education University of British Columbia      [International Handbook of Mathematical Learning Difficulties](#) Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in

learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society Zambezia ,1991 **Teacher in Zimbabwe** ,2014

**Calendar** University of Zimbabwe,1994 Indigenous Studies: Breakthroughs in Research and Practice Management Association, Information Resources,2019-10-11 Global interest in indigenous studies has been rapidly growing as researchers realize the importance of understanding the impact indigenous communities can have on the economy development education and more As the use acceptance and popularity of indigenous knowledge increases it is crucial to explore how this community based knowledge provides deeper insights understanding and influence on such things as decision making and problem solving Indigenous Studies Breakthroughs in Research and Practice examines the politics culture language history socio economic development methodologies and contemporary experiences of indigenous peoples from around the world as well as how contemporary issues impact these indigenous communities on a local national and global scale Highlighting a range of topics such as local narratives intergenerational cultural transfer and ethnicity and identity this publication is an ideal reference source for sociologists policymakers anthropologists instructors researchers academicians and graduate level students in a variety of fields *Empowerment Through Language* Zaline M. **Regime and Education in Zimbabwe** Bekithemba Dube,Albert Mufanechiya,2024-06-10 This collection focuses on the post independence educational development in Zimbabwe It shows how the ZANU PF regime has presided over the demise of education and covers a wide range of topics such as violence against teachers poor salaries student activism minority languages and curriculum innovations This volume argues that the regime has used education as a tool for repression Curriculum innovations introduced and implemented in Zimbabwe have little to do with improving the performance of the

learners and more to do with stopping teachers from pushing the regime change agenda Consequently this has resulted in a nation in crisis marked with high turnover poor economy and mass exodus of teachers and learners The contributors to this volume make various suggestions which could recenter education towards addressing the experiences of the learners as opposed to being used as a tool to push repression and thwart democracy      **Zimbabwe Books in Print** ,1998      **Vowel Epenthesis in Loanword Adaptation** Christian Uffmann,2012-02-14 While it is commonly assumed that languages epenthesize context free default vowels this book shows that in loanword adaptation several strategies are found which interact intricately Large loanword corpora in Shona Sranan Samoan and Kinyarwanda are analyzed statistically and the patterns are modeled in a version of Optimality Theory which introduces constraints on autosegmental representations The focus of this book is on English loans in Shona providing an in depth empirical and formal analysis of epenthesis in this language The analysis of additional languages allows for solid typological generalizations In addition a diachronic study of epenthesis in Sranan provides insight into how insertion patterns develop historically In all languages analyzed default epenthesis exists alongside vowel harmony and spreading from adjacent consonants While different languages prefer different strategies these strategies are subject to the same set of constraints however In spreading feature markedness plays an important role alongside sonority We suggest universal markedness scales which combine with constraints on autosegmental configurations to model the patterns found in individual languages and at the same time to constrain the range of possible crosslinguistic variation      **The Effectiveness of the Primary School Teacher in Zimbabwe** Boniface Samuel Runesu Chivore,1994      **Reading Literacy at Junior Secondary School Level in Zimbabwe** Rosemary Moyana,2000 Zimbabwe invested in much human and material development of education from independence in 1980 Many innovative ideas have been explored to improve the quality of education with a particular focus on reading literacy In 1988 Zimbabwe joined 31 other countries in a reading literacy research study at primary and junior secondary school levels under the International Association for the Evaluation of Educational Achievement Data is taken from 143 schools and over 2000 students      *Resources in Education* ,2001      **The International Encyclopedia of Education** Torsten Husén,T.
