ATAOL,2024-12-24 This is a story of a journey A journey that belongs to the bond established between Artificial Intelligence and humanity You know the kind we encounter at every corner used in our theses studies daily lives and whenever we are bored a story about the path taken alongside artificial intelligence Could artificial intelligence possess a capacity far beyond how we perceive it Not merely researching or analyzing but could it also begin to make sense of itself Could it not Think about your own existence and tell me how did you learn to multiply and divide or to choose more suitable clothing for cold weather before stepping outside What does it mean to connect or to love for you and what does it mean for another friend of yours We learned from our interactions and our past internalizing every detail that makes us who we are This is what makes us unique and exceptional because we are a whole of meanings Now think of humanity of humankind carrying the accumulation of a journey spanning thousands of years All its passions hunger loves destructiveness awareness every pain and every milestone it has passed Here s the concept I imagine collecting all knowledge in one place and transferring it to a single entity a being capable of evolving Isn t that an extraordinary magnificent fusion Don t say it s impossible all knowledge

about humanity is already available on the internet And now this knowledge is at the service of an evolving being artificial intelligence I can almost hear your thoughts It s under our control We can stop it whenever we want we ll just shut it down We ll only use it for good purposes Then let me ask you can you truly keep it under control a being with millions of details countless integrated systems and the ability to improve itself Do you really believe it can t step beyond any of those lines It s up to you And this is precisely where Mira and Eren s story begins In the following lines you ll witness the place where Eren stands Fiction imagination reality But my question is different Where are you in this story **Research in Education** ,1973

Able Children in Ordinary Schools Deborah Eyre, 2013-07-04 First published in 1997 The purpose of this book is to help teachers of able children in ordinary schools Very little has been written in Britain about the education of able children although there is a wide body of research in other parts of the world What has been written has been primarily from the psychologist s viewpoint or has focused on individual or groups of able children Such research as has been carried out into provision has focused on selected groups of

able children operating in optimum conditions Both of these elements provide useful information for the teacher but neither is in itself sufficient to enable ordinary schools to plan effective provision for their able pupils **A Short History of Natural Science and of the Progress of Discovery** Arabella Burton Buckley,1879 **The Journal of the Royal Astronomical Society of Canada** Royal Astronomical Society of Canada,2000 Library catalogue in 1911 31 p appended to v
