Office of Research and Development,1976 **Planning and Designing Research Animal Facilities** Jack Hessler,Noel Lehner,2011-04-28 Research institutions have or are planning to build expand and renovate animal research facilities to keep up with the demands of biomedical research caused in part by growth in the use of genetically altered rodents and the upsurge of research in infectious diseases Properly designed facilities greatly facilitate effective management and high quality day to day animal care that is required to optimally support animal research and testing There are multiple solutions to address the myriad of factors that influence the design and construction of animal research facilities There is no best design applicable for all facilities and arguably not even a single best design for a given facility For this reason Planning and Designing Research Animal Facilities is not intended to be a how to book The goal is to cover the basic programmatic requirements of animal research facilities provide ideas for meeting those requirements while hopefully stimulating the creative process in which designers in consultation with those who work in animal research facilities generate even better ideas That is how progress has been made and will continue to be made Facilitates communication between the parties involved in planning and designing animal facilities by providing contemporary information and stimulating creativity that will help lead to wise decisions and advance the knowledge base for planning design and constructing animal research facilities Architectural, Construction, Environmental and Digital Technologies for Future Cities Natalia Potienko,Elena Ahmedova,Antonina Karlina,Vladimir Faerman,2022-04-27 This book offers an overview of Russian and international experience in developing the concept of future cities and its practical implementation The concept of future cities is associated with several important trends The first trend is the sustainable development of the urban environment and the implementation of eco friendly technologies and materials in civil construction industrial and power plants The harmonious coexistence of the citizens with all forms of nature in the urban habitat becomes a great value The second trend is the individualization of the aesthetical and architectural image of the future cities The city s unique flavor based on the blending of the historical legacy and architectural traditions is now as important as the utility of the environment The third trend is the digitalization of the urban environment with the use of state of the art sensors information and communication technologies and data science The efficiency of operations and services achieved by the extensive use of complex IoT networks becomes a value as well The last trend is the adaptation of the urban and social environment for individual demands of a community and a person Individual comfort and safety are now more important than ever before By

addressing these trends the volume discusses local and international plans practices and technologies aimed at the development and implementation of future cities
