Abstract: Peer pressure is influential in swaying adolescents' actions and decisions. To investigate the holistic influence of peer pressure on adolescence, this paper conducts literature reviews on peer pressure's influence on adolescents regarding risky behavior, romantic relationships, and academic investment. The results show that peers are capable of bringing up and down adolescents' rate of engaging in risky behavior depending on the quality of the friendship. Peers influence adolescent sexual behavior and partner selection, and they have a high level of intervention in their romantic relationships, presenting both positive and negative influences. Peers influence adolescents' effort exerted on academic work depending on the type of image that adolescents are trying to maintain and the degree to which an adolescent's school value hard work. The paper also traces the biological and sociocultural causes of peer pressure's huge influence on adolescents and provides recommendations for alleviating negative peer pressure.

Keywords: peer pressure, adolescents, risky behavior, romantic relationship, academic performances

1. Introduction

Peers are groups of people who share similar interests, ages, backgrounds, or social standing. They are an essential source of knowledge, criticism, and support for people as they develop their sense of self. The presence of peers is particularly important during adolescence because adolescents start to shift from spending quality time with families to spending time with friends and peers. Peers become a safe arena where adolescents can experiment, learn, and maintain certain social norms with peers, prompting adolescents' competence while trying to find their identity and autonomy on the path to becoming adults. As significant as peers' role in adolescents, peer pressure is often inevitable. Peer pressure happens when peers exert pressure on adolescents to engage or not engage in certain behavior. Such pressure can be as explicit as spoken or direct peer pressure or as subtle as unspoken and indirect peer pressure, but it is equally influential on adolescents, who crave peer acceptance and novel experiences. Currently, there is extensive psychological research on peer pressure's influence on different activities like investment, substance, aggression, and many more. However, a more holistic view of the role that peer pressure plays in adolescents' lives is limited. Therefore, due to the great influence and prevalence of peer pressure in adolescence, this essay investigates the current situation of peer pressure by examining peers' influence on adolescents regarding risky behavior, romantic relationship, and academic performance. The essay also traces the reason why adolescents

Research Paper On Peer Pressure:

Peer Pressure, Peer Prevention Barbara J. Costello, Trina L. Hope, 2016-02-19 Criminological research has largely neglected the possibility that positive peer influence is a potentially powerful source of social control. Quantitative methods tease out cause effect and spuriousness in the relationship between peer delinquency and personal delinquency but these methods do little or nothing to reveal how and why peers might influence each other toward or away from deviance. Costello and Hope take a first step toward uncovering the mechanisms of peer influence drawing on quantitative and qualitative data collected from two convenience samples of university students. Their quantitative analyses showed that positive peer influence occurs most frequently among those who associate with the most deviant peers and self report the most deviance contrary to predictions drawn from social learning theories. Their qualitative data revealed a variety of methods of negative influence including encouraging deviant behavior for others amusement a motive for peer influence never before reported in the literature. *Research Papers of the National Commission on Judicial Discipline & Removal* National Commission on Judicial Discipline & Removal (U.S.), 1993 Research reports and papers prepared for the Commission as part of its research program. There is a considerable difference between being a student at school and university and previous research has highlighted the difficulties faced by first year university students during their transition phase. Higher education institutions and their departments acknowledge the challenges faced by new students and they differ in their approach to coping with the issue each seeks to find the most effective solution for its students. To reduce the withdrawal rate during the first year of college higher education providers are expected to apply transition programs to help students transition. The Handbook of Research on Coping Mechanisms for First Year Students Transitioning to Higher Education presents a comprehensive account of the dynamics in higher education institutions and culture shock for new students and analyzes models and theories of adjustment of new students in higher education institutions. Covering key topics such as gender institutional support and success factors this reference work is ideal for administrators higher education professionals researchers scholars academicians practitioners instructors and students.
