Society Ivo Supićić, 1987 The subject of this study has two distinct but not unrelated aspects first an investigation into the
sociology of music as an autonomous and specialized discipline and second an examination of certain fundamental facts that
may be considered within the purview of the sociology of music itself If an analysis and study even a preliminary one of these
facts is to be properly focused and fruitful we must first try to determine the subject and methods of the sociology of music
its position and boundaries in respect to musicology and most especially its relation to the aesthetics of music and music
history It is equally indispensable to ascertain what the sociology of music as a separate scholarly discipline embraces where

its investigation leads and finally to establish its position vis a vis sociology in general From the Author s Introduction
