

Murthal varsity gets approval to establish computer centre

TRIBUNE NEWS SERVICE

SONEPAT, JULY 15

Deenbandhu Chhotu Ram University for Science and Technology (DCRUST), Murthal, would soon get a state-of-the-art computer centre worth Rs 5 crore. The state government has given administrative approval to establish the project on the university premises.

Vice-Chancellor SP Singh said the centre would be established on the second floor of the Saraswati Library Complex. He said the proposed computer centre is envisioned as a centralised hub of computing resources, technical support services, and collaborative workspaces designed to meet the evolving needs of students, faculty, and staff.

"The primary aim of the proposed computer centre is to provide the university community with access to cutting-edge computing facilities and support services, which empower them to excel in their academic and research endeavours," the VC added.

Whether it's conducting complex simulations, analysing big data sets, developing software applications, or engaging in collaborative projects, the computer centre will serve as a catalyst for innova-

tion and learning across various disciplines, he added.

There would be a provision of around 350 computers in the computer centre and all the computers would be connected to the internet. A separate work station would be developed for each student. Apart from this, there would be special arrangements for teachers and technical staff in the centre, he said.

Though all students would be able to use the computer centre, for the students doing research, there would be special arrangements of computers with state-of-the-art software, the VC added.

Moreover, the computer centre will foster a culture of collaboration and interdisciplinary engagement, facilitating knowledge sharing, teamwork, and innovation among students, faculty, and staff, the VC said.

He said that in addition to supporting academic and research activities, the computer centre will also play a crucial role in enhancing the operational efficiency of administrative processes at DCRUST.

Gupta, 2020-03-04 International Conference on Advances in Power Generation from Renewable Energy Sources APGRES 2020 **Exploring the Earth's Crust** C. Prodehl, Walter D. Mooney, 2012 This volume contains a comprehensive worldwide history of seismological studies of the Earth's crust using controlled sources from 1850 to 2005. Essentially all major seismic projects on land and the most important oceanic projects are covered. The time period 1850 to 1939 is presented as a general synthesis and from 1940 onward the history and results are presented in separate chapters for each decade with the material organized by geographical region. Each chapter highlights the major advances achieved during that decade in terms of data acquisition, processing technology, and interpretation methods. For all major seismic projects, the authors provide specific details on field observations, interpreted crustal cross sections, and key references. They conclude with global and continental scale maps of all field measurements and interpreted Moho contours. An accompanying DVD contains important out-of-print publications and an extensive collection of controlled source data, location maps, and crustal cross sections.
