Sepedi Paper2 2014:

Effectiveness of teachers' guides in the Global South Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers' guides across 13 countries and 19 projects. Using quantitative and qualitative methods, we examine how teachers' guides across the projects differ and find substantial variation in the design and structure of the documents. We develop a scripting index so that the scripting levels of the guides can be compared across projects. The impact results of the programs that use teachers' guides show significant impacts on learning outcomes associated with approximately an additional half year of learning, showing that structured teachers' guides contribute to improved learning outcomes. During observations, we find that teachers make a variety of changes in their classroom instruction from how the guides are written, showing that the utilization of structured teachers' guides does not create robotic teachers unable to use their own professional skills to teach children. Unfortunately, many changes that teachers make reduce the amount of group work and interactivity that was described in the guides, suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide. The report includes a set of research-based guidelines that material developers can use to develop teachers' guides that will support effective instructional practices and help improve learning outcomes. The key takeaway from the report is that structured teachers' guides improve learning outcomes, but that overly scripted teachers' guides are somewhat less effective than simplified teachers' guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide.

Global Perspectives on Youth Language Practices Cynthia Groff, Andrea Hollington, Ellen Hurst-Harosh, Nico Nassenstein, Jacomine Nortier, Helma Pasch, Nurenzia Yannuar, 2022-02-07 Most journal articles, edited volumes, and monographs on youth language practices deal with one specific variety, one geographical setting, or with one specific continent. This volume bridges these different studies and approaches youth language from a much broader angle. A global framework and a diversity of methodologies enable a wider perspective that gives room to comparisons of youth's manipulations and linguistic agency, transnational communicative practices, and language contact scenarios. The research presented addresses structural features of everyday talk and text, youth identity issues related to specific purposes and contexts, and sociocultural emphases on ideologies and belonging. Combining insights into sociolinguistic and structural features of youth language, the volume includes case studies from Asia, Indonesia, Australia, and Oceania, Arnhem Land, New Ireland, South America, the Amazon, Chile, Argentina, Europe, Germany, Spain, and Africa, Uganda, Nigeria, DR Congo, Central African Republic, South Africa. It expands on existing publications and offers a more comparative and global approach without a division of youth's strategies in terms of geographical space or language family. This collection, including a conceptual introduction, is of interest to scholars from several linguistic subfields working in different regional contexts, as well as sociologists and anthropologists working in the field of adolescence and youth studies.
