**Caregiving**

**Full-Time and Working Full-Time** Dr. Keith Washington, 2015-01-14 How will Alzheimers disease affect your career Alzheimers related caregiving duties present expected and unexpected costs for full time employed caregivers employers and society Research indicates that caregivers provide more than forty hours per week caring for a relative with Alzheimers disease The dual responsibilities and pressures of caregiving while remaining active in the general workforce may cause stress and loss of productivity at work As the Alzheimers disease progresses in the patient a caregiver is less likely to engage in more challenging workplace activities or accept additional roles of responsibility promotions or relocation opportunities Just as the employed caregiver takes on a dual role when providing care for the Alzheimers patient Alzheimers disease plays a dual role in depleting the life of both the patient and the caregiver This book explores some of the challenges related to the

dual roles of a working caregiver and the demands faced caring for a loved one with Alzheimers disease      A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies Andrew Ebekozi, Clinton Ohis Aigbavboa, Wellington Didibhuku Thwala, 2025-02-19 A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies aims to fill the dearth of practical research guidance and reference material with specific focus on the built environment in developing countries Global policy agendas such as Agenda 2030 the SDGs highlight the importance and growth of research and knowledge from emerging nations who are increasingly contributing to research that is critical for development and advancement The role of built environment practitioners will continue to evolve by building on the sound foundations laid down by the professions and by exploiting to the full the new technologies available to us through conducting innovative research but more guidance on the research process is necessary to ensure the integrity and quality of the output This book has been structured so that each chapter is largely free standing allowing the reader undergraduate postgraduate or practitioner to reference the material with ease It aims to provide practical guidance on conducting research and on writing a dissertation or report and begins by considering the general research background in a built environment context It then covers research ethics before moving on to discuss the importance of selecting the right research topic and title and writing a clear abstract The chapters then cover introducing a research project and the authors include a section on the problem statement research questions aims and objectives research gap s and motivations for the study The book goes on to cover the literature review section theoretical and conceptual frameworks the various types of methodological approaches and when to apply them The findings section discussion of the results and the study s implications are then discussed before the final chapters cover the conclusion and recommendations The book provides a useful reference for higher education students graduates postgraduates and practitioners engaged in all aspects of construction and built environment research      **Research Design** John W.
