**Africa in the Age of Globalisation** Assoc Prof Edward Shizha, Assoc Prof Lamine Diallo, 2015-04-28 This is a collection of bold and visionary scholarship that reveals an insightful exposition of re-visioning African development from African perspectives. It provides educators, policy makers, social workers, non-governmental agencies and development agencies with an interdisciplinary conceptual base that can effectively guide them in planning and implementing programs for socio-economic development in Africa. The book provides up-to-date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa: politics, democracy, education, gender, technology, global relationships and the role of non-governmental organisations. The authors challenge the familiar paradigms in order to show how imperfectly, if at all, assumptions about globalisation and development theories have failed in their depictions and applications to Africa. The scholars in this volume both inform and advocate for a re-visioning of perceptions on Africa and how it navigates global processes.

**Social Studies Education in East Asian Contexts** Kerry J. Kennedy, 2020-07-28 The book explores the state of social studies education within selected East Asian societies and provides some insights into distinctive classroom practices. In an increasingly volatile and unpredictable world, the education of young people who both understand the contexts in which they are growing up and see the need for engaging with them is a top priority. This task falls to social studies education, which carries the responsibility for inducting young people into their social world and helping them to see the role they can play within it. This is particularly important in East Asia, where strong economic growth, long-held cultural values and diverse political systems create an environment that challenges young people on multiple fronts. This book, with its team of regional authors, shows how different societies in the region are dealing with these challenges and what can be expected from future citizens. The book will appeal to policy makers, researchers and teachers interested in the current state of social studies education in East Asian societies.
