operate diesel engines on board United States naval vessels The Myth of the Press Gang Jeremiah Ross Dancy, 2015
 Overturns the generally held view that the press gang was the main means of recruiting seamen by the British navy in the late eighteenth century SHORTLISTED for the Society for Nautical Research's prestigious Anderson Medal The press gang is generally regarded as the means by which the British navy solved the problem of recruiting enough seamen in the late eighteenth century This book however based on extensive original research conducted primarily in a large number of ships muster books demonstrates that this view is false It argues that in fact the overwhelming majority of seamen in the navy were there of their own free will Taking a long view across the late eighteenth century but concentrating on the period of the French Revolutionary and Napoleonic Wars of 1793-1815 the book provides great detail on the sort of men that were recruited and the means by which they were recruited and includes a number of individuals' stories It shows how manpower was a major concern for the Admiralty how the Admiralty put in place a range of recruitment methods including the quota system how it worried about depleting merchant shipping of sufficient sailors and how although most seamen were volunteers the press gang was resorted to especially during the initial mobilisation at the beginning of wars and to find certain kinds of particularly skilled seamen The book also makes comparisons with recruitment methods employed by the navies of other countries and by the British army J Ross Dancy is Assistant Professor of History at Sam Houston State University **Mare Island Naval Shipyard Disposal and Reuse, City of Vallejo, Solano County**, 1998 Brassey's Naval Annual Earl Thomas Allnutt Brassey, 1948 *Establishment of Steam Generating Facility Producing Steam for Purchase by the Navy, Girard Point Site, Philadelphia*, 1988 **Combined Operations**, 2023-01-05 From the warmer climate of the Mediterranean to the frozen wastes of Norway's Arctic islands the Combined Operations organization was a persistent thorn in the side of Hitler's Third Reich From mounting attacks against enemy-held coastlines with small teams of less than a dozen men through to huge expeditions involving thousands of troops and other personnel the headquarters of Combined Operations oversaw a wide variety of amphibious operations all undertaken with the sole aim of tying down the Führer's forces The raids both big and small were mounted as frequently as possible against anywhere boats could reach keeping the Axis forces constantly on guard The effects of the early Combined Operations far outweighed the resources committed to the raids with an extra 30,000 German troops being sent to garrison Norway following the Commando raids the largest of which included only around 500 men The Combined Operations organization grew as the war progressed and it was instrumental in the planning and training of troops and the provision of landing craft for the amphibious assaults which saw the capture of French North Africa Operation Torch and the invasion of Sicily Operation Husky Its culminating glory came in the summer of 1944 when the largest amphibious operation in history saw a quarter of a million men shipped across the English Channel to the beaches of Normandy on D Day and its aftermath Combined Operations is an official history that explores the full story of how the body was set up its structure and how it put together the hugely complex tri-service

operations Also detailed is how its headquarters staff operated and how the planning section functioned in 1942 for example the planners envisaged one raid every month which culminated in the disastrous Dieppe raid in August of that year The Combined Operations organization was also instrumental in the development and provision of specialist landing craft and ships and of the clearing of beach obstacles and mines all of which is explored in detail As might be expected a large proportion of the book is dedicated to the various and fascinating projects in preparation for Operation Overlord which saw the culmination of everything that had been learned in the successes and failures throughout four years of amphibious warfare
