Subcommittee on National Parks, Recreation, and Public Lands, 2002 **Active Bodies** Martha H. Verbrugge, 2012-06-21 During the twentieth century opportunities for exercise sports and recreation grew significantly for most girls and women in the United States Female physical educators were among the key experts who influenced this revolution Drawing on extensive archival research this book examines the ideas experiences and instructional programs of white and black female physical educators who taught in public schools and diverse colleges and universities including coed and single sex public and private and predominantly white or black institutions Working primarily with female students women physical educators had to consider what an active female could and should do in comparison to an active male Applying concepts of sex differences they debated the implications of female anatomy physiology reproductive functions and psychosocial traits for achieving gender parity in the gym Teachers interpretations were contingent on where they worked and whom they taught

They also responded to broad historical conditions including developments in American feminism law and education society's changing attitudes about gender race and sexuality and scientific controversies over the nature and significance of sex differences While deliberating fairness for female students white and black women physical educators also pursued equity for themselves as their workplaces and nascent profession often marginalized female and minority personnel Questions of difference and equity divided the field throughout the twentieth century while some women teachers favored moderate views and incremental change others promoted justice for their students and themselves by exerting authority at their schools critiquing traditional concepts of difference and devising innovative curricula Connecting the history of science race and gender studies American social history and the history of sport this book sheds new light on physical education's application of scientific ideas the politics of gender race and sexuality in the domain of active bodies and the enduring complexities of difference and equity in American culture

**In the Shadow of Authoritarianism** Thomas D. Fallace, 2018 In the Shadow of Authoritarianism explores how American educators in the wake of World War I created a student centered curriculum in response to authoritarian threats abroad For most of the 20th century American educators lived in the shadow of ideological political cultural and existential threats including Prussianism propaganda collectivism dictatorship totalitarianism mind control the space race and moral relativity To meet the perceived threat the American curriculum was gradually moved in a more student centered direction that focused less on what to think and more on how to think This book examines the period between World War I and the 1980s focusing on how

U S schools countered the influence of fascist and communist ideologies as well as racial discrimination Fallace also considers this approach in light of current interests in the Common Core State Standards Perhaps the recent rise of new authoritarian threats not just abroad but also at home will rejuvenate our long tradition of democratic education Schools have served as the bulwarks of democracy before Let s hope they can do so again guided by this smart little book Jonathan Zimmerman University of Pennsylvania Fallace offers a fresh provocative history of democratic education as it has been practiced in the United States Walter Parker University of Washington

**THE WHISTLE-BLOWER ON CORRUPT SCIENCE** P.S.J. (Peet) Schutte, 2012-12-14 The Whistle Blower on Corrupt Science Science went corrupt the day Edmund Halley in 1705 told the world he used the physics formula of his friend Isaac Newton to calculate the route that Halley s comet took and the time it would arrive This was where science went crooked a position that went on ever since because that same dishonesty is still present in Newtonian science Halley calculated the time periods since 1066 at the battle of Hastings and found a comet was mentioned every seventy six years This was very ordinary for a man of his class so he had to get far cleverer than backdate history to get a time frame So he really got clever and conspired with the biggest fraud in science ever since the man that stole all the physics Doctor Hooks invented the man who even got Kepler figures wrong the man called Isaac Newton Halley said he used the formula of Newton to calculate the route the comet took This says he used mass to calculate how the comet came to the sun According to Newton s science the sun s mass pulled the comet and the comet s mass pulled right back and in this way the comet came to the sun I don t go into the comet as such in this book but I do in other books In this book I show how Newtonian science started to go corrupt in 1705 with one conspiracy to cheat and became the corrupt myth it now developed into How do I know Halley did not use the mass pull mass idea It is because if he did so then how did he calculate that the comet was cyclic or that it returns every seventy six years If mass pulled the comet to the sun what then pushed to comet back into outer space His big ambition was to prove the comet comes and goes but if mass makes the comet come what pushes the comet back You know what is the biggest fraud that came to be called Newtonian science The most brilliant minds on earth this past three hundred years failed to ask this simple question if mass pulls the comet closer what pushes the comet away If mass forms the force of pulling and pulled the comet closer then what pushed the comet back into the darkness of the beyond How did he know the mass of Halley s comet Nobody then asked questions No one asks uneasy question except me I show the fake science we have Newton and Halley got away with corrupt science If you wish to prove wrong I challenge you to prove that Newton is correct Today just like it was and keeping the trend go on modern Newtonians gets away with even more corrupt science than anyone can imagine Coral Anika Theill, 2003-01-01 BONSHEA shares my search for freedom and light in a society based on patriarchal religion and laws
