Brain Oscillations in Human Communication Anne Keitel, Johanna Rimmele, Sophie Molholm, Joachim Gross, 2018-04-20 Brain oscillations or neural rhythms reflect widespread functional connections between large scale neural networks as well as within cortical networks As such they have been related to many aspects of human behaviour An increasing number of studies have demonstrated the role of brain oscillations at distinct frequency bands in cognitive sensory and motor tasks Consequentially those rhythms also affect diverse aspects of human communication On the one hand this comprises verbal communication a field where the understanding of neural mechanisms has seen huge advances in recent years Speech is

inherently organised in a rhythmic manner For example time scales of phonemes and syllables but also formal prosodic aspects such as intonation and stress fall into distinct frequency bands Likewise neural rhythms in the brain play a role in speech segmentation and coding of continuous speech at multiple time scales as well as in the production of speech On the other hand human communication involves widespread and diverse nonverbal aspects where the role of neural rhythms is far less understood This can be the enhancement of speech processing through visual signals thought to be guided via brain oscillations or the conveying of emotion which results in differential rhythmic modulations in the observer Additionally body movements and gestures often have a communicative purpose and are known to modulate sensorimotor rhythms in the observer This Research Topic of Frontiers in Human Neuroscience highlights the diverse aspects of human communication that are shaped by rhythmic activity in the brain Relevant contributions are presented from various fields including cognitive and social neuroscience neuropsychiatry and methodology As such they provide important new insights into verbal and non verbal communication pathological changes and methodological innovations

The Oxford Handbook of Clinical Child and Adolescent Psychology Thomas H. Ollendick, Susan Williams White, Bradley A. Advances in Plant Breeding Strategies: Industrial and Food Crops Jameel M. Al-Khayri, Shri Mohan Jain, Dennis V. Johnson, 2019-10-14 This book examines the development of innovative modern methodologies towards augmenting conventional plant breeding in individual crops for the production of new crop varieties under the increasingly limiting environmental and cultivation factors to achieve sustainable agricultural production enhanced food security in addition to providing raw materials for innovative industrial products and pharmaceuticals This is Vol 6 subtitled Industrial and Food Crops which consists of two parts Included in Part I are 11 industrial plant species utilized as sources of raw materials for the production of industrial products including pulp and wood crops acacia fiber cotton jute and ramie rubber guayule and rubber tree oil jojoba and flax biofuels and pharmaceutical agave and sugar source sugarcane Part II covers 7 food plants selected for their utilization in food industries for the production of chocolate cacao cooking oil oil palm safflower sesame and sunflower and natural flavors and aroma saffron and vanilla This volume is contributed by 60 internationally reputable scientists from 14 countries Each chapter comprehensively reviews the modern literature on the subject and reflects the authors own experience

The Genus Citrus Manuel Talon, Marco Caruso, Fred G. Gmitter jr., 2020-01-21 The Genus Citrus presents the enormous amount of new knowledge that has been generated in recent years on nearly all topics related to citrus Beginning with an overview of the fundamental principles and understanding of citrus biology and behavior the book provides a comprehensive view from Citrus evolution to current market importance Reporting on new insights supported by the elucidation of the citrus genome sequence it presents groundbreaking theories and fills in previous

knowledge gaps Because citrus is among the most difficult plants to improve through traditional breeding citrus researchers institutions and industries must quickly learn to adapt to new developments knowledge and technologies to address the biological constraints of a unique fruit tree such as citrus Despite the challenges of working with citrus tremendous progress has been made mostly through advances in molecular biology and genomics This book is valuable for all those involved with researching and advancing producing processing and delivering citrus products *Achieving sustainable cultivation of potatoes Volume 1* Prof. Gefu Wang-Pruski,2018-08-09 Reviews latest research on understanding potato plant physiology and genetic variety Discusses major advances in conventional and hybrid breeding as well as their application in improved varieties Focuses on ways of supporting smallholders in key regions such as Africa

Oxford Textbook of Suicidology and Suicide Prevention Danuta Wasserman,2021 Part of the authoritative Oxford Textbooks in Psychiatry series the new edition of the Oxford Textbook of Suicidology and Suicide Prevention remains a key text in the field of suicidology fully updated with new chapters devoted to major psychiatric disorders and their relation to suicide

Understanding Suicide Philippe Courtet,2016-03-05 In this book international experts address a range of key current issues relating to suicide The opening chapters discuss nosology definitions clinical determinants and conceptual models of the suicide process and consider the evidence regarding potential biomarkers of suicide risk based on neuroscientific research Adopting a neo Durkheimian perspective the role of various social factors in the genesis of suicidal behavior is then explored in depth Practical user friendly tools that facilitate risk assessment by clinicians are provided and detailed consideration is given to efficient and innovative strategies for the prevention of suicide and the treatment of suicidal behavior such as psychotherapy psychopharmacological approaches and effective organization of care including surveillance and the use of online tools The final part of the book focuses on the need for and development of a personalized approach within the field of suicide prevention

The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management Liza H. Gold,Richard L. Frierson,2020-03-08 Charged with updating the preeminent text on suicide the new editors of The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management opted not to simply revise existing chapters but instead to steer a bold course expanding reconfiguring and remaking the third edition to reflect the latest research nomenclature and clinical innovations The editorial team and contributors two thirds of whom are new to this edition have taken the intersection of suicide with both mental health and psychosocial issues as their organizing principle exploring risk assessment and epidemiology in special populations such as elderly patients college students military personnel and the incarcerated as well as patients with a variety of psychological disorders including bipolar spectrum personality depressive anxiety posttraumatic stress and other disorders and schizophrenia In addition the book discusses treatment options such as cognitive behavioral therapy dialectical behavioral therapy and pharmacotherapy and settings such as emergency services outpatient inpatient and civil commitment in detail with clinical cases to contextualize the

material The new and revised content is extensive A chapter on the influence of sleep and sleep disorders on suicide risk has been included that considers possible mechanisms for this link and discusses practical ways of assessing and managing sleep disorders to mitigate suicide risk Nonsuicidal self injury the prevalence of which is particularly high among youth is addressed in detail differentiating it from and comparing it to suicide attempts discussing risk assessment considering safety interventions examining treatment options and exploring suicide contagion No text on suicide would be complete without a serious exploration of the role of social media and the internet The book presents an update on current research as it pertains to social networking and behavior information access and artificial intelligence and software and includes suggestions for clinicians treating patients at risk for suicide Physician assisted dying PAD also referred to as aid in dying is arguably a form of suicide and the book includes a thoughtful chapter considering the ethical and practical implications of PAD the murky professional and legal obligations that may arise the demographics of these patients the settings and conditions under which PAD may occur and the role of the attendant clinicians A number of pedagogical features are included to help the reader learn and remember the material including key clinical concepts and abundant case examples Its diverse range of perspectives broad relevance to a wide variety of clinicians and absolutely authoritative coverage makes this new edition of The American Psychiatric Association Publishing Textbook of Suicide Risk Assessment and Management a worthy and indispensable successor

Advances on Genomics and Genetics of Horticultural Crops and their Contribution to Breeding Efforts, volume II Eleni Tani,Aliki Xanthopoulou,Christos Bazakos,2024-03-06 Horticultural crops are an excellent source of vitamins antioxidants and fibers that play an important role in human health The discovery of modern genomic tools the continuous generation of genomic data and the application of comparative and functional genomics are high importance innovations with numerous applications in crop breeding The utilization of all these new techniques in combination with the analysis of genomic data using bioinformatics tools contribute to a better understanding of the function of various agronomic traits of interest as well as horticultural crops breeding Over the last few years novel genome editing tools such as the CRISPR Cas9 have been developed and revolutionized molecular technologies due to their simplicity high efficiency and specificity

Low Intensity Breeding of Native Forest Trees in Argentina Mario J. Pastorino,Paula Marchelli,2020-11-18 Global climate change requires the development of programs that consider the active restoration of degraded forests and the use of native trees in afforestation to preserve the natural environment International commitments like the UN REDD program the Montreal Process and the Convention on Biological Diversity call for the breeding of species rarely contemplated by large industrial companies Low intensity breeding is the most rational strategy for those species simple but robust and not dependent on continuously increasing funding and therefore effective even with a relatively small budget It commonly focuses on high genetic diversity rather than improving economic traits and adaptability rather than productivity Controlled crosses with full pedigrees typical of high intensity breeding are replaced by open pollination This

book presents state of the art breeding strategies from the last two decades for several forest tree species of prime importance in the natural forests of Argentina. They are distributed in the three main forestry ecoregions of the country: the subtropical dry forest Chaco, the subtropical rain forests Yungas and Alto Paran rainforests, and the temperate forests of Patagonia. The book also discusses the genetic patterns of the selected species defined using genetic markers together with the analysis of the variation in quantitative traits. Further, it examines the crucial features of their reproductive biology, such as the mating system and gene flow, and describes the current breeding programs. Lastly, it presents the latest developments in genetic resources and their emerging applications, concluding with some reflections and perspectives related to the conditioning imposed by climate change.
