The Crisis of the 14th Century Martin Bauch, Gerrit Jasper Schenk, 2019-12-16 Pre modern critical interactions of nature and society can best be studied during the so called Crisis of the 14th Century While historiography has long ignored the environmental framing of historical processes and scientists have over emphasized nature's impact on the course of human history this volume tries to describe the at times complex modes of the late medieval relationship of man and nature The idea of teleconnection borrowed from the geosciences describes the influence of atmospheric circulation patterns often over long distances It seems that there were teleconnections in society too So this volume aims to examine man environment interactions mainly in the 14th century from all over Europe and beyond It integrates contributions from different disciplines on impact perception and reaction of environmental change and natural extreme events on late Medieval societies For humanists from all historical disciplines it offers an approach how to integrate written and even scientific evidence on environmental change in established and new fields of historical research For scientists it demonstrates the contributions scholars from the humanities can provide for discussion on past environmental changes

Dictionary of Global Climate Change W.J. Maunder, 2012-12-06 Climate climate change climate fluctuations and climatic trends are only a few of the terms used today in not only conferences scientific symposia and workshops but also parliaments and in discussions throughout society To climatologists these terms may be well known to the vast majority of people however they are new and they require definition and explanation The World Meteorological Organization WMO inherited an interest and involvement in the studies of climate and climate change from its predecessor the International Meteorological Organization IMO which was established in 1873 By 1929 the IMO had set up a Commission for Climatology to deal with matters related to climate studies When in 1950 the World Meteorological Organization assumed the mantle of the IMO it retained the commission which among other responsibilities had already recognized the need for the definition and explanation of terms used in climatology It must also be said that much of what we now know about climate derives from the scientific and technical programmes coordinated by IMO and now to a much greater extent by WMO In 1979 the First World Climate Conference made an assessment of the status of knowledge of climate and climate variability and recommended the establishment of a

World Climate Programme This recommendation was fully endorsed by the Eighth World Meteorological Congress and the World Climate Programme was subsequently established by WMO in co operation with the International Council of Scientific Unions ICSU and the United Nations Environment Programme UNEP Encyclopedia of World Climatology John E. Oliver, 2008-04-23 Today given the well publicized impacts of events such as El Ni o there is an unequaled public awareness of how climate affects the quality of life and environment Such awareness has created an increasing demand for accurate climatological information This information is now available in one convenient accessible source the Encyclopedia of World Climatology This comprehensive volume covers all the main subfields of climatology supplies information on climates in major continental areas and explains the intricacies of climatic processes The level of presentation will meet the needs of specialists university students and educated laypersons A successor to the 1986 Encyclopedia of Climatology this compendium provides a clear explanation of current knowledge and research directions in modern climatology This new encyclopedia emphasizes climatological developments that have evolved over the past twenty years It offers more than 200 informative articles prepared by 150 experts on numerous subjects ranging from standard areas of study to the latest research studies The relationship between climatology and both physical and social science is fully explored as is the significance of climate for our future well being The information is organized for speedy access Entries are conveniently arranged in alphabetical order thoroughly indexed and cross referenced Every entry contains useful citations to additional source materials The Editor John E Oliver is Professor Emeritus at Indiana State University He holds a B Sc from London University and a MA and Ph D from Columbia University He taught at Columbia University and then at Indiana State where he was formerly Chair of the Geography Geology Department and Associate Dean College of Arts and Sciences He has written many books and journal articles in Climatology Applied Climatology and Physical Geography Encyclopedia of Global Warming Steven I. Dutch, 2010 This work offers complete authoritative coverage of the science policy and social issues surrounding global warming and climate change The Encyclopedia of Global Warming provides comprehensive coverage of the questions of global warming and climate change including scientific descriptions and explanations of all factors from carbon dioxide to sunspots that might contribute to climate change It is designed to provide students at the high school and undergraduate levels with a convenient source of information on fundamental science and sociopolitical issues including the debates and controversies surrounding climate change The study of climate change involves not only scientists but also politicians policy makers businesses government and nongovernment agencies and the general public A student attempting to understand both the environmental science and social issues and controversies will encounter not just scientific terms and concepts but political organizations geographic areas social concepts persons countries organizations and laws as well Each essay in the set falls into one or more of the following broad categories animals Arctic and Antarctic astronomy chemistry and geochemistry climatic events and epochs conferences and meetings cryology and glaciology

A Mist Connection Katrin Kleemann, 2023-06-06 In the summer of 1783 an unusual dry fog descended upon large parts of the northern hemisphere The fog brought with it bloodred sunsets a foul sulfuric odor and a host of other peculiar weather events Inspired by the Enlightenment many naturalists attempted to find reasonable explanations for these occurrences Between 8 June 1783 and 7 February 1784 a 27 kilometer long fissure volcano erupted in the Icelandic highlands It produced the largest volume of lava released by any volcanic eruption on planet Earth in the last millennium In Iceland the eruption led to the death of one fifth of the population The jetstream carried its volcanic gases further afield to Europe and beyond where they settled as a fog the origin of which puzzled naturalists and laypersons A Mist Connection is an environmental history that documents the Laki eruption and its consequences for Iceland and the wider world The book

combines methods of historical disaster research climate history global history history of science and geology in an interdisciplinary approach Icelandic flood lava eruptions of this scale have a statistical recurrence period of 200 to 500 years it is crucial to understand their nature so that we can prepare for the next one An eruption of this magnitude would surely be disastrous for our modern globalized and interconnected world

Postcards from the Anthropocene. Benek Cincik,Tiago Torres-Campos,2022-04-19 This book includes various responses to the geopolitical conditions of our tangent times through collections of visual materials and theoretical explorations with critical positionings The book expands on the Anthropocene theory by exploring its relations with the aesthetic concerns in contemporary representations through their geopolitical ramifications We conceptualize postcards as documentary space time snapshots which convey complex assemblages of dynamic non linear unpredictable ad hoc networks between interdependent and transcalar actors in deep time The postcards we assemble raise questions about the ethical and political challenges of the dominant modes of technoscientific knowledge production modes that are constituted through existing power relationships subject positions and differences and that perpetuate current inequalities They catalyse speculative and creative geopolitical imaginaries and collective subjectivities that recalibrate existing value systems and indicate alternatives

The Apocalyptic Dimensions of Climate Change Jan Alber,2021-09-07 Climate change and the apocalypse are frequently associated in the popular imagination of the twenty first century This collection of essays brings together climatologists theologians historians literary scholars and philosophers to address and critically assess this association The contributing authors are concerned among other things with the relation between cultural and scientific discourses on climate change the role of apocalyptic images and narratives in representing environmental issues and the tension between reality and fiction in apocalyptic representations of catastrophes By focusing on how figures in fictional texts interact with their environment and deal with the consequences of climate change this volume foregrounds the broader social and cultural function of apocalyptic narratives of climate change By evoking a sense of collective human destiny in the face of the ultimate catastrophe apocalyptic narratives have both cautionary and inspirational functions Determining the extent to which such narratives square with scientific knowledge of climate change is one of the main aims of this book
