**The Great European Rip-off** David Craig, Matthew Elliott, 2009 A devastating indictment of EU waste and corruption from the author of *Squandered* *The Great European Rip-off* David Craig, Matthew Elliott, 2009-03-05 In this EU referendum year it's time for people across Europe to look at what really goes on in Brussels in our name It has been estimated that the EU costs us around 1 000 billion a year an incredible 2000 for every man woman and child in Europe So what do we get for our money Politicians and administrators selflessly working to bring us efficient government Well targeted regulations that promote economic prosperity A safe and free society A well protected environment Help for people in poorer countries Or is our money being squandered by a self serving euro elite of unaccountable politicians and incompetent bureaucrats or else devoured in a feeding frenzy of fraud and corruption where a few lucky insiders become unimaginably rich at our expense And is the tsunami of regulation pouring out of Brussels in reality strangling industry destroying jobs restricting personal freedom desecrating the environment and further impoverishing the developing world Using their extensive network of insider sources David Craig and Matthew Elliott smash through the secrecy and disinformation that are the Brussels hallmark to reveal what our European rulers are really getting up to The result is a horrifying story of bureaucracy hypocrisy and kleptocracy and how we are all suffering as a result **White Skin, Black Fuel** Andreas Malm, The Zetkin Collective, 2021-05-18 Rising temperatures and the rise of the far right What disasters happen when they meet In the first study of the far right's role in the climate crisis *White Skin Black Fuel* presents an eye opening sweep of a novel political constellation revealing its deep historical roots Fossil fuelled technologies were born steeped in racism No one loved them more passionately than the classical fascists Now right wing forces have risen to the surface some professing to have the solution closing borders to save the nation as the climate breaks down Epic and riveting *White Skin Black Fuel* traces a future of political fronts that can only heat up **How Press Propaganda Paved the Way to Brexit** Francis Rawlinson, 2020-01-21 This book traces how right wing newspapers in Britain helped shape British public opinion about the European Union over the course of the 20 years preceding the EU referendum in June 2016 The author argues that newspapers such as the Telegraph Mail Sun and Express have been effectively waging a long term propaganda war with the distortions and borderline fake news presented one of the factors that helped secure the narrow majority for Brexit Written by an EU insider the book presents hard facts and debunks the core myths on EU laws exorbitant budget contributions and uncontrolled immigration and contributes to the broader debate on the importance of the press for democracy *Handbook of Alternative Theories of Economic Development* Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28 The *Handbook of Alternative Theories of Economic Development* explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo classical tenets With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields this volume

represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle it includes chapters on African, Chinese, Indian and Muslim approaches to economic development. Different schools are also explored and discussed including nineteenth century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory and world systems theories of development. In addition the Handbook has chapters on important events and institutions including The League of Nations, The Havana Charter and UNCTAD as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers and students of development studies and indeed anyone interested in alternatives to development orthodoxy.

**The Nobel Factor** Avner Offer, Gabriel Söderberg, 2019-11-19. Economic theory may be speculative but its impact is powerful and real. Since the 1970s it has been closely associated with a sweeping change around the world: the market turn. This is what Avner Offer and Gabriel Soderberg call the rise of market liberalism, a movement that seeks to replace social democracy. It holds up buying and selling as the norm for human relations and society. Our confidence in markets comes from economics and our confidence in economics is underpinned by the Nobel Prize in Economics, which was first awarded in 1969. Was it a coincidence that the market turn and the prize began at the same time? *The Nobel Factor*, the first book to describe the origins and power of the most important prize in economics, explores this and related questions by examining the history of the prize, the history of economics since the prize began and the simultaneous struggle between market liberals and social democrats in Sweden, Europe and the United States. *The Nobel Factor* tells how the prize, created by the Swedish central bank, emerged from a conflict between central bank orthodoxy and social democracy. The aim was to use the halo of the Nobel brand to enhance central bank authority and the prestige of market-friendly economics in order to influence the future of Sweden and the rest of the developed world. And this strategy has worked with sometimes disastrous results for societies striving to cope with the requirements of economic theory and deregulated markets. *IBSS: Political Science: 2009 Vol. 58* The British Library of Political and Economic Sciences, 2010-11. **Corruption - the World's Big C** Ian Senior,2006 There is general agreement that the world would be a better place without corruption but there is less general understanding of precisely what constitutes corruption In this book Ian Senior carefully defines corruption and finds that it is all too prevalent not just in developing countries but also within the institutions of governments within the EU The book analyses the causes and consequences of corruption There are many social and moral problems created by corruption but from an economic perspective it has to be regarded as a serious impediment to the proper functioning of a market economy It also has the effect of redistributing wealth away from the poor towards the better off and towards employees of government Ian Senior proposes a zero tolerance approach to rooting out corruption In particular we should not give aid to the governments of under developed countries or use corrupt agencies for the distribution of aid This monograph reminds us just how widespread corruption is and of the serious damage it can cause to the development of a market economy and a free society
