The Happy Failure Annotated Edition:

Sink or Swim Andrew Kopec, 2025-08-25 People living in the nineteenth century United States saw shocking upheavals in both the economy and in ideas of selfhood in a commercial society. Narratives such as Horatio Alger's rags to riches tales allured Americans with visions of financial success while events such as the Panics of 1819, 1837, 1857, and 1865 threatened them with sudden and devastating financial failure. The antebellum period's go-ahead ethos encouraged individuals to form an identity amid this chaos by striving for financial success through risk taking that is to form a capitalist self. Andrew Kopec argues that writers of this era were not immune to this business turbulence; rather, their responses to it shaped the development of American literature. By examining the public and private writings of well-known American writers including Washington Irving, Catharine Maria Sedgwick, Nathaniel Hawthorne, Herman Melville, and Frederick Douglass, Kopec contends that instead of anxiously retreating from the volatile market, these figures deliberately engaged with it in their writing. These writers grappled with both the limits and opportunities of capitalist selfhood and tried in various ways to harness the economy's energies for the benefit of the self. In making this argument, Kopec invites readers to consider how this era of American literature questioned the ideologies of capitalist identity that seem inescapable today.

The Annotated Innocence of Father Brown G. K. Chesterton, 2012-04-26 Father Brown, an ordinary priest whose unremarkable exterior conceals extraordinary crime-solving ability, is celebrated for his solutions to metaphysical mysteries, a genre perfected by his creator G. K. Chesterton. More than lighthearted comedies built around puzzling crimes, these superbly written tales contain deeply perceptive philosophical reflections. *The Innocence of Father Brown* (1911) was the first collection of stories featuring the ecclesiastical sleuth and is widely considered the best. In this annotated edition of the collection, the Chesterton scholar Martin Gardner provides detailed notes and background information on various aspects of such stories as *The Blue Cross*, *The Secret Garden*, *The Invisible Man*, *The Hammer of God*, *The Eye of Apollo*, and seven more, as well as an informative introduction and an extensive bibliography. Included also are eight illustrations reproduced from the first edition. The result is an indispensable companion for all Chesterton enthusiasts and a perfect introduction for anyone who has yet to meet the incomparable Father Brown.

How Economics Professors Can Stop Failing Us Steven Payson,2017-08-18 This book provides an eye opening expos on economics professors that will surely shock anyone who is not familiar with the topic and even some of those who are familiar with it It is critical of the behavior of economics professors but is not critical of the field of economics itself In fact the book argues that it is essential for economics professors to improve in the work they perform precisely because of the vital importance of their field Other books that criticize economics professors typically present complex arguments that interest only the most advanced scholars However this book is completely different It is written to be understandable to anyone who has with an interest in economics regardless of their background At the same time the book does include the most relevant scholarly arguments it just presents them in a manner that allows anyone to understand them Also unlike other books on economics How Economics Professors Can Stop Failing Us is written in the context of a genuine expos As such it ventures backstage behind the show business that has dominated the profession revealing the profession s deep dark and at times rather ugly secrets The book is able to do this by having an author who has experienced first hand studied and written on this topic area for over three decades who has organized training seminars on it and who has served for over a decade as the Executive Director of the Association for Integrity and Responsible Leadership in Economics While exposing the profession s shameful problems the book also offers great hope in providing realistic solutions to them One of the main solutions it proposes is for economics professors who are now failing us to follow and learn from those other professors who are not failing us who have instead admirably upheld the principles of professional ethics and scientific integrity In this sense How Economics Professors Can Stop Failing Us offers the most hope and perhaps the only hope for economics professors to improve and to play the responsible role that their students their employers and society overall expects of them

Machor offers a sweeping exploration of how American fiction was received in both public and private spheres in the United States before the Civil War Machor takes four antebellum authors Edgar Allan Poe Herman Melville Catharine Sedgwick and Caroline Chesebro and analyzes how their works were published received and interpreted Drawing on discussions found in book reviews and in private letters and diaries Machor examines how middle class readers of the time engaged with contemporary fiction and how fiction reading evolved as an interpretative practice in nineteenth century America Through careful analysis Machor illuminates how the reading practices of nineteenth century Americans shaped not only the experiences of these writers at the time but also the way the writers were received in the twentieth century What Machor reveals is that these authors were received in ways strikingly different from how they are currently read thereby shedding significant light on their present status in the literary canon in comparison to their critical and popular positions in their own time Machor deftly combines response and reception criticism and theory with work in the history of reading to engage with groundbreaking scholarship in historical hermeneutics In so doing Machor takes us ever closer to understanding the particular and varying reading strategies of historical audiences and how they impacted authors conceptions of their own readership
