The Hot Zone By Richard Preston Random House February 5 1995:

Diseased Cinema Robert Alpert, Merle Eisenberg, Lee Mordechai, 2023-09-29 Discusses how the depiction of diseases in movies has changed over the last century and what these changes reveal about American culture Examines disease movies as a genre that has emerged over the last century and includes pandemic and zombie films Reveals the changes to the genre's narratives over three broad time periods the beginning of film through the 1980s the 1990s through the mid 2000s and the late 2000s and afterward Investigates the evolution of disease movies through three perspectives historically notable films remakes and franchises Analyses disease movies in the context of the development of American global capitalism and the fragmentation of the social contract Explains the role of disease movie narratives in the American experience of Covid American movies about infectious diseases have reflected and driven dominant cultural narratives during the past century These movies both real pandemics and imagined zombie outbreaks have become wildly popular since the beginning of the 21st century They have shifted from featuring a contained outbreak to an imagined containment of a known disease to a globalized uncontrollable pandemic of an unknown origin Movie narratives have changed from identifying and solving social problems to a despair and acceptance of America's failure to fulfil its historic social contract Movies reflect and drive developments in American capitalism that increasingly advocates for individuals and their families rather than communities and the public good Disease movies today minimize human differences and envisage a utopian new world order to advance the needs of contemporary American capitalism These movie narratives shaped reactions to the outbreak of Covid and reinforced individual responsibility as the solution to end the pandemic **The New York Times Book Review**, 1995

Gathering Storm Sammy Tippit, 1996-06 Uncontrollable disease Widespread disasters Increased lawlessness Rise of false prophets As evidence of the end times mounts discover how we can light our lamps for Christ and become beacons in the gathering darkness *Novel Gazing* Eve Kosofsky Sedgwick, 1997-12-15 *Novel Gazing* is the first collection of queer criticism on the history of the novel The contributors to this volume navigate new territory in literary theory with essays that implicitly challenge the hermeneutic of suspicion widespread in current critical theory In a stunning introductory essay Eve Kosofsky Sedgwick delineates the possibilities for a criticism that would be reparative rather than cynical or paranoid The startlingly imaginative essays in the volume explore new critical practices that can weave the pleasures and disorientations of reading into the fabric of queer analyses Through discussions of a diverse array of British French and American novels including major canonical novels best sellers children's fiction and science fiction these essays explore queer worlds of taste

texture joy and ennui focusing on such subjects as flogging wizardry exorcism dance Zionist desire and Internet sexuality Interpreting the works of authors as diverse as Benjamin Constant Toni Morrison T H White and William Gibson along with canonical queer modernists such as James Proust Woolf and Cather contributors reveal the wealth of ways in which selves and communities succeed in extracting sustenance from the objects of a culture whose avowed desire has often been not to sustain them The dramatic reframing that these essays perform will make the significance of Novel Gazing extend beyond the scope of queer studies to literary criticism in general Contributors Stephen Barber Renu Bora Anne Chandler James Creech Tyler Curtain Jonathan Goldberg Joseph Litvak Michael Lucey Jeff Nunokawa Cindy Patton Jacob Press Robert F Reid Pharr Eve Kosofsky Sedgwick Melissa Solomon Kathryn Bond Stockton John Vincent Maurice Wallace Barry Weller

The Myth of Global Chaos Yahya M. Sadowski, 2001-09-19 When the Cold War ended in 1989 American hopes for a new world order were quickly disappointed A new wave of violence soon erupted engulfing places from Rwanda and Somalia to Chechnya and Bosnia These new clashes of civilizations fundamentalist jihads and ethnic massacres appeared to be more savage and less rational than the long twilight struggle with the USSR during which Washington's adversary was clearly identified and relatively predictable In an effort to understand these post Cold War conflicts and to advise the government on how to deal with them a new school of foreign policy thought has developed Dubbed chaos theory it argues that the much heralded processes of globalization are actually breeding a reaction of irrational violence Thus the spread of Western cultural icons through new electronic media often shocks and offends moral sensibilities in traditional societies The explosive growth of international commerce has triggered a wave of migration and urbanization that throws together people from different cultures and fertilizes xenophobia Chaos theory has already won converts in the U S military the intelligence community and the foreign service Its influence has been manifest in an array of policies particularly during the U S engagement in Bosnia But chaos theory is mostly wrong In this book the author outlines the growth of chaos theory and its growing influence and then provides a thorough empirical critique Using detailed studies of Bosnia and global comparisons he shows that globalization has not played a decisive role in fueling recent conflicts Indeed journalists impressions notwithstanding there is no evidence that since 1989 warfare has become more savage or even more frequent The advocates of chaos theory are thus urging the U S to invest in preparing for a threat that is largely mythical a strategy that is at least wasteful and potentially dangerous The author argues that the most use

The DTIC Review, 1999 Sovereign Lives Jenny Edkins, Michael J. Shapiro, Veronique Pin-Fat, 2012-10-02 For International Relations scholars discussions of globalization inevitably turn to questions of sovereignty How much control does a country have over its borders people and economy Where does that authority come from Sovereign Lives explores these changes through reading of humanitarian intervention human rights discourses securitization refugees the fragmentation of identities and the practices of development

The Routledge History of Disease Mark Jackson, 2016-08-05 The Routledge History of Disease draws on innovative scholarship in the

history of medicine to explore the challenges involved in writing about health and disease throughout the past and across the globe presenting a varied range of case studies and perspectives on the patterns technologies and narratives of disease that can be identified in the past and that continue to influence our present Organized thematically chapters examine particular forms and conceptualizations of disease covering subjects from leprosy in medieval Europe and cancer screening practices in twentieth century USA to the ayurvedic tradition in ancient India and the pioneering studies of mental illness that took place in nineteenth century Paris as well as discussing the various sources and methods that can be used to understand the social and cultural contexts of disease Chapter 24 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://www.routledgehandbooks.com/doi/10.4324/9781315543420.ch24>

Bombs, Bugs, Drugs, and Thugs Loch K. Johnson, 2000-11 Drawing on personal interviews and contacts Johnson U of Georgia examines the current state of US strategic intelligence explaining how the government aspires to no less than global transparency the ability to ferret out information on potential dangers in every corner of the world He also reveals however that the system remains a number of jealously protected domains rather than an integrated whole Annotation copyrighted by Book News Inc Portland OR

The System Andy Turnbull, 2005 *Challenging Euro-America's Politics of Identity* Jorge Luis Andrade Fernandes, 2008-01-07 In this fascinating book Jorge Luis Andrade Fernandes critically examines the impact of colonialism and postcolonial migration on the politics and identity of Euro American imperial powers It considers how outsiders are part of the construction of the native identity of the nation state and also how they challenge its essential coherence when they return to the centre in our increasingly globalized world Engaging in a theoretically motivated discussion of a range of sources film fiction political theory and state policy the volume traces the nomadic movement of bodies across national frontiers helping us to question any natural link between nation states and identities and between places and peoples This is not merely a theoretical problem as Fernandes relates it to the very current crisis of nativistic multicultural identity in the West He examines how politics takes shape in transnational social and cultural encounters and how this new politics is not just about containing aliens but also contains fruitful possibilities for different modes of being Challenging Euro America's Politics of Identity will be of interest to advanced students and scholars in politics geography postcolonial studies cultural studies African and African American studies comparative literature American studies and Ethnic studies

Understanding Biological Emergencies Paula Stamps Duston, 2024-11-05 This book investigates the links between the main sources of biological emergencies and presents a comprehensive policy framework that seeks to achieve the ultimate goal of biological security The work offers a new interdisciplinary approach to analyse the linkages between the three main sources of biological emergencies intentional attacks natural zoonotic transmission and lab accidents In doing so the text describes the history of using nature to create a weapon focusing on dispersal methods The most important Select Agents for monitoring are described with a special focus on anthrax and smallpox The case studies

presented include the use of the Biological Weapons Convention BWC in Iraq and the 2001 anthrax attack in the US The policies that created the emergency preparedness system are analysed and the current system is described in terms of their effectiveness in responding to the COVID 19 pandemic The book concludes with some ideas and specific suggestions for moving from response to risk reduction and prevention This book will be of much interest to students of biosecurity studies public health public policy political science and international relations and to professionals working in the fields of public health public safety medicine nursing and first responders as well as military personnel

Notes of a Potato Watcher

James Lang, 2001 Native to the New World the potato was domesticated by Andean farmers probably in the Lake Titicaca basin almost as early as grain crops were cultivated in the Near East Full of essential vitamins and energy giving starch the potato has proved a valuable world resource Curious Spaniards took the potato back to Europe from whence it spread worldwide Today the largest potato producer is China with India not far behind To tell the potato's story Lang has done fieldwork in South America Asia and Africa Jacket

Making Threats

Betsy Hartmann, Banu Subramaniam, Charles Zerner, 2005 Today we live in times of proliferating fears The daily updates on the ongoing war on terror amplify fear and anxiety as if they were necessary and important aspects of our reality Concerns about the environment increasingly take center stage as stories and images abound about deadly viruses alien species invasions scarcity of oil water food safety of GMOs biological weapons and fears of overpopulation Making Threats Biofears and Environmental Anxieties addresses how such environmental and biological fears are used to manufacture threats to individual national and global security Contributors from environmental studies political science international security biology sociology and anthropology discuss what they share in common the view that fears should be critically examined to avoid unnecessary alarm and scapegoating of people and nations as the enemy Other In these highly original and thought provoking essays Making Threats focuses on five themes security scarcity purity circulation and terror No other book has systematically examined the proliferation of fear in the context of current world events and from such a multidisciplinary perspective It consolidates in one place cutting edge research and reflection on how the contemporary landscape of fear shapes and is shaped by environmental and biological discourses By uncovering the linguistic tools that make fear resonate in the public consciousness by identifying the interests that create or are sustained by fears in short by giving fears histories Making Threats Biofears and Environmental Anxieties engages with some of the most potent and disturbing political and cultural aspects of the contemporary scene

Killer

Germs Barry Zimmerman, David Zimmerman, 2002-09-06 Everything readers ever wanted to know about deadly viruses killer parasites flesh eating microbes and other lifethreatening beasts but were afraid to ask What disease known as the White Death has killed 2 billion people and counting What fatal disease lurks undetected in air conditioners and shower heads waiting to become airborne How lethal is the Ebola virus and will there ever be a cure for it How do you catch flesh eating bacteria Killer Germs takes readers on a fascinating sometimes horrifying journey into the amazing world of viruses bacteria

protozoa fungi and worms and explores the roles they have played in shaping the course of human history From biblical plagues to the AIDS crisis to supergerms of the future this updated and revised edition of the original covers the whole gamut of diseases that have threatened humanity since its origins It also includes a new chapter on the history of bioterrorism and the deplorable role it has played and is likely to play in the phenomenal diversity of diseases
