Modernity and Epistemology in Nineteenth-Century Spain Ryan A. Davis, Alicia Cerezo Paredes, 2016-12-14 The fraught tension between science and religion has loomed large in scholarship about the nineteenth century in Spain especially given the prominence of the Catholic Church and the discoveries made by Wallace and Darwin The struggle for epistemological superiority between these two discourses science and religion has served to overshadow certain corners of the cultural landscape that though prominent sites of intellectual exploration in their day have received comparatively less scholarly attention until recently Fringe Discourses brings together a group of essays that seeks to restore a sense of the epistemological richness of nineteenth century Spain By exploring the relationship between epistemology modernity and subjectivity these essays recover significant efforts by Spanish authors and

intellectuals to explain human nature and their world which seemed to be changing so radically before their eyes In doing so the essays also reveal just how elastic the relationship was between science and pseudoscience genius and quackery Offering a veritable Wunderkammer the authors collected here train their sights both on curious fields of study from pogonolgy the science of beards to Spiritualism and curiouser people from a government spy on undercover assignment in Morocco dressed as a Moorish prince to a hypnotic huckster who dupes the queen regent With other authors focusing on science fiction dystopias mystical journeys and anatomical symbology *Fringe Discourses* reveals the Spanish nineteenth century for the intellectual Wild West it was *Gender, Displacement, and Cultural Networks of Galicia* Obdulia Castro, Diego Baena, María A. Rey López, Miriam Sánchez Moreiras, 2022-07-02 This book bringing together a multi voiced dialogue between academic scholars and professionals from diverse fields shares a comprehensive and heterogeneous look at the interdisciplinarity of Galician Studies while examining a chronologically broad range of subjects from the 1800s to the present This volume carves out a distinct approach to gender studies investigating issues of culture language displacement counterculture artists and community projects as related to questions of politics gender and class Women conceived as both individual and political bodies are studied among other things as an example of what it means to struggle from the margins emphasizing the importance of looking at the opposition between the center and the peripheries when studying the relationship between space and culture **A Guide to Spanish Literature in Translation** Lawrence J. Los pazos de Ulloa Emilia Pardo Bazán (condesa de), 1886 *Organic Memory* Laura Otis, 1994-01-01 How does the past live in us Do we inherit our ancestors memories as we do their physical characteristics In the nineteenth century mainstream science embraced a long standing superstition the belief that memory could be inherited Scientists reasoned that just as bodies were reproduced from generation to generation so were thoughts memories and cultural achievements Heredity and identity were no mere family matter but the basis of nations The glories and sins of the past were not gone they remained in the tissues of living people who could be honored or blamed accordingly *Organic Memory* surveys the literary and scientific history of an idea that will not go away Focusing on the years between 1870 and 1918 Otis explores both the origins and the consequences of the idea that memories can be inherited The organic memory theory contributed to the genocidal programs of the Third Reich and it erupts in pop psychology racist propaganda and ethnic cleansing To track the spread intensity and

endurance of this especially powerful idea Otis singles out major authors whose work reinforced or ridiculed belief in organic memory They include writers who were internationally influential yet who simultaneously represented their national traditions Thomas Mann Sigmund Freud C G Jung Emile Zola Thomas Hardy Miguel de Unamuno P o Baroja Emilia Pardo Baz n and even Sir Arthur Conan Doyle The debates over the human genome project and the explosions of ethnic violence in the former Yugoslavia in Azerbaijan Somalia and elsewhere demonstrate how seriously organic memory continues to affect modern medicine and politics

Cigar Smoke and Violet Water Joyce Tolliver, 1998 In *Cigar Smoke and Violet Water* a work informed by feminist and narrative theory as well as by linguistic discourse analysis Joyce Tolliver considers narrative tactics and their cultural context in the nineteenth century Spanish writer Emilia Pardo Bazan 1851 1921 The critical focus is on the narrative voices in short stories by this writer and on the role gender plays both in narrative dynamics and in the writer s engagement with her public

Mother Nature Emilia Pardo Bazan, 2010 *Mother Nature* is certainly Emilia Pardo Bazan s greatest contribution to the Realistic Naturalistic Spanish novel of her time and represents her literary powers at the very height of her career as a writer It has been said that this novel presents the keenest challenges and the most compelling rewards offering the reader the purposefully overgrown ecological social and moral background for a poignant central narrative of human frailty that pits the desire for personal happiness against the necessity of meeting moral standards
