Zeitz,2011-09-01 Historians of postwar American

politics often identify race as a driving force in the dynamically shifting political culture Joshua Zeitz instead places religion and ethnicity at the fore arguing that ethnic conflict among Irish Catholics Italian Catholics and Jews in New York City had a decisive impact on the shape of liberal politics long before black white racial identity politics entered the political lexicon Understanding ethnicity as an intersection of class national origins and religion Zeitz demonstrates that the white ethnic populations of New York had significantly diverging views on authority and dissent community and individuality secularism and spirituality and obligation and entitlement New York Jews came from Eastern European traditions that valued dissent and encouraged political agitation their Irish and Italian Catholic neighbors tended to value commitment to order deference to authority and allegiance to church and community Zeitz argues that these distinctions ultimately helped fracture the

liberal coalition of the Roosevelt era as many Catholics bolted a Democratic Party increasingly focused on individual liberties and many dissent minded Jews moved on to the antiliberal New Left *Underkill* David C. Gompert, Stuart E. Johnson, Martin C. Libicki, David R. Frelinger, John IV Gordon, 2009-04-01 The U S military is ill equipped to strike at extremists who hide in populations Using deadly force against them can harm and alienate the very people whose cooperation U S forces are trying to earn To solve this problem a new RAND study proposes a continuum of force a suite of capabilities that includes sound light lasers cell phones and video cameras These technologies are available but have received insufficient attention *The Advocate* ,2005-07 Document Retrieval Index ,1974 Seven Shots Jennifer C. Miller, 2019-07-04 A comprehensive collection on police and policing written by experts in political theory sociology criminology economics law public health and critical theory Putting Fear of Crime on the Map Bruce J. Doran, Melissa B. Burgess, 2011-09-21 Since first emerging as an issue of concern in the late 1960s fear of crime has become one of the most researched topics in contemporary criminology and receives considerable attention in a range of other disciplines including social ecology social psychology and geography Researchers looking the subject have consistently uncovered alarming characteristics primarily relating to the behavioural responses that people adopt in relation to their fear of crime This book reports on research conducted over the past eight years in which efforts have been made to pioneer the combination of techniques from behavioural geography with Geographic Information Systems GIS in order to map the fear of crime The first part of the book outlines the history of research into fear of crime with an emphasis on the many approaches that have been used to

investigate the problem and the need for a spatially explicit approach The second part provides a technical break down of the GIS based techniques used to map fear of crime and summarises key findings from two separate study sites The authors describe collective avoidance behaviour in relation to disorder decline models such as the Broken Windows Thesis the potential to integrate fear mapping with police community partnerships and emerging avenues for further research Issues discussed include fear of crime in relation to housing prices and disorder the use of fear mapping as a means with which to monitor the impact of Closed Circuit Television CCTV and fear mapping in transit environments Policing within the Law John Eterno, 2003-07-30 At a time when police abuses and errors make the headlines it is important to understand just what goes into the decisions that police make when they are confronted with various crime scenarios in the line of duty Required to respond within the law many officers are able to respond in a legal manner to crime situations in which court decisions are written clearly and with easily applied guidelines But what happens when those decisions and laws are written in a way that invites interpretation and varies from situation to situation Based on a case study of New York City police officers this important volume analyzes how officers contend with often ambiguous laws in the face of specific crime scenarios In addition the author explores other influences on police decision making including officer characteristics and attitudes and makes policy recommendations in an effort to encourage the reinforcement of legal guidelines so that the rights of individuals are appropriately balanced with the duty to control crime Based on a survey of nearly 1 300 officers responses to specially designed hypothetical crime scenarios this study illustrates how police officers are likely to react with regard to the law in these situations While officers tend to act legally where the laws are clear less clearly articulated laws leave the police with a variety of different options for action in ambiguous situations For instance in weapons scenarios the survey showed that officers would often take advantage of ambiguity in the law with regard to how they may respond In drug scenarios officers will increase their tendency to do a search if the situation is slightly ambiguous though they will decrease their search responses when the situation appears to be highly ambiguous Eterno carefully examines the various responses and the laws that are meant to guide what police may or may not do in given situations concluding that better laws and bright line rules will help to check and balance the need to fight crime aggressively while preventing the abuse of authority that may arise in questionable circumstances
