Impacts of Globalization and Innovation in Mathematics Education Njurai, Evelyn, Uworwabayeho, Alphonse, 2024-07-18 In the face of emerging challenges in the field of mathematics education educators and researchers find themselves navigating the complexities of globalization and innovations As classrooms

become more diverse and educational landscapes evolve there is a need for an understanding of the multifaceted impacts of these forces The very essence of mathematics education is shifting influenced by global trends cultural dynamics and technological advancements It is within this context that *Impacts of Globalization and Innovation in Mathematics Education* offers a profound exploration of the challenges and opportunities that arise in this era One of the central predicaments faced by educators and scholars is the dynamic nature of globalization and innovation which introduces unprecedented complexities in mathematics education While cultural diversity in classrooms brings valuable perspectives it also poses challenges in developing inclusive and effective teaching strategies The integration of innovative practices faces resistance due to cultural conflicts and identity issues Additionally the fast paced changes in global trends and the dissemination of information through media influence how mathematics education is perceived and practiced This creates a demand for a thorough examination of the relationship between globalization innovation and the field of mathematics education

Approximate Number System and Mathematics Jingguang Li,Xinlin Zhou,Marcus Lindskog,2019-11-25 Humans process quantity information without the aid of language or symbols to guide a variety of everyday life decisions The cognitive system that supports this intuitive skill is often referred to as the approximate number system ANS It has been argued that the ANS serves as the foundation of the formal symbolic number system mathematics Abundant empirical evidence is supportive of this view acuity of the ANS is positively correlated with symbolic math performance training of the ANS may cause improvements in symbolic math performance and the ANS and symbolic number processing may share a common neural underpinning However recently several theories and empirical data cast doubt on the role of the ANS in symbolic math processing This e book aims to advance our understanding of the underlying mechanisms of the overlap between the ANS and mathematics

Statistical Modeling and Simulation for Experimental Design and Machine Learning

Executive Function and Education

Mariëtte Huizinga,Dieter Baeyens,Jacob A. Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on

stimulation in the child's social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success
